The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Labopharm Inc. business.

About Labopharm Inc.

Labopharm inc. operates as a specialty pharmaceutical company. As of December 31, 2009, the company's once-daily tramadol product had received regulatory approval in 39 countries, including the United States, Canada, Australia, South Korea, Brazil, and in various European countries.

The company has entered into agreements for its distribution in several countries, including the United States, most European countries, Canada, Australia, Israel, South Korea and Turkey.

As of December 31, 2009, the company's product had been commercially launched in 17 countries, including the five tramadol markets in Europe, Canada, and the United States where its product was launched by marketing and distribution partner, Purdue Pharma Products L.P., or Purdue Pharma, in 2009.

Products

Once-Daily Tramadol

The company offers a once-daily formulation of tramadol. Tramadol is a centrally acting,

mild opioid analgesic. Once-daily tramadol product consists of a dual matrix delivery system designed to provide both rapid and sustained drug release to maintain blood levels within the therapeutic range providing a full 24 hours of pain relief. Tramadol is part of a sub-class of the larger pain market used to treat moderate to severe pain. This group of products also includes hydrocodone combinations, codeine, high dose NSAIDs, low-dose long-acting opioids, oxycodone, and oxycodone combinations.

Once-Daily Trazodone

The company offers a formulation of trazodone that is therapeutically equivalent in terms of extent of drug exposure to the marketed forms of immediate release trazodone. Trazodone is an antidepressant available in the United States as a generic immediate release formulation requiring three times daily dosing. In Europe, trazodone is available in immediate release and extended release, twice-daily formulations. Trazodone is indicated and prescribed for depression with or without anxiety.

Twice-Daily Tramadol Acetaminophen

The company's twice-daily formulation of tramadol and acetaminophen is designed to improve patient use by extending the duration of pain relief beyond that of the marketed immediate-release products. In addition to providing immediate relief of moderate to moderately severe pain, it can also provide sustained relief for a full 12-hour period. Tramadol-acetaminophen products are marketed worldwide and are available in immediate release, four to six-time daily formulations.

Suppliers

The company's main supplier is Cargill Inc.

History

Labopharm inc. was founded in 1990.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
