The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Lagardere SCA business.

About Lagardere SCA

Lagardere SCA operates as a media and high technology group. The company's media operating sectors include book publishing, the press, distribution and audiovisual. Its high-tech activities are illustrated by its 14.95% strategic interest in the European company EADS. The company also engages in the communications and aerospace industries.

Book Publishing

The company's subsidiary, Hachette Livre, publishes books in three languages: French, Spanish and English. Its focus is on general literature, textbooks and illustrated books. It also publishes booklets to be sold at newsstands.

Press

The company's subsidiary, Hachette Filipacchi Medias, publishes magazine with 260 titles in approximately 41 countries, a circulation of approximately 1 billion copies, and paid advertising of 130,000 pages per year. In France, Hachette Filipacchi Medias also has a daily newspaper and supplement branch and has developed various complementary activities, including a photo and licensing division.

Distribution Services

The company's subsidiary, Hachette Distribution Services, facilitates the general public's access to a diverse range of ideas and cultures. Hachette Distribution Services operates the foremost international chain of retail outlets for cultural, multimedia and entertainment products (4,000 stores) under internationally known banner names (such as Relay and Virgin) as well as chains with a strong local identity (Payot, Le Furet du Nord and Inmedio).

Audio Visual

The company's subsidiary, Lagardere Active, engages in the business of radio, television and new media. Its radio stations include Europe 1, Europe 2, RFM and 17 stations outside France. Its TV division operates 11 special-interest television channels, among them MCM, Europe 2 TV, Canal J and Gulli, and 16 production companies, including GMT Productions, DEMD Productions and Angel Productions. It is also active in the new-media segment. Lagardere Active also holds 34% of CanalSat.

High Technologies

EADS provides services to civil aviation with Airbus. It is a helicopter manufacturer with Eurocopter. It also engages in the space industry in Europe.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
