The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Lakeland Financial Corp. business.

About Lakeland Financial Corp.

Lakeland Financial Corporation operates as the holding company for Lake City Bank, which provides commercial, retail, wealth advisory, and investment management services to its customers.

The company's main banking office is located in Warsaw, Indiana. As of December 31, 2009, it had 43 offices in 12 counties throughout northern Indiana, as well as a loan production office in Indianapolis.

Products and Services

The company's activities cover various phases of commercial banking, including demand deposits, checking accounts, savings and transaction accounts, time deposits, the sale of securities under agreements to repurchase, commercial, real estate and agricultural lending, direct and indirect consumer lending, commercial and residential real estate mortgage lending, retail and merchant credit card services, corporate treasury management services, retirement services, bond administration, safe deposit box service, and trust and brokerage services.

The company's commercial products include commercial loans and technology-driven

solutions to commercial customers' cash management needs, such as Internet business banking and on-line cash management services in addition to retirement services, bond administration and health savings account services. Retail banking clients are provided various traditional retail banking services, including lending, deposit and investment services. Retail lending programs are focused on mortgage loans, home equity lines of credit and traditional retail installment loans, including indirect automotive financing.

The company provides credit card services to retail and commercial customers through an outsourced retail card program and merchant processing activity. It also has an Honors Private Banking program that is positioned to serve the customer with a menu, including investment management and trust services, executive mortgage programs and access to financial planning seminars and programs. The company provides wealth advisory clients with traditional personal and corporate trust and investment services. It also provides retail brokerage services, including financial and investment products, such as annuities and life insurance.

Investment Portfolio

As of December 31, 2009, the company's investment portfolio included U.S. treasury securities; U.S. government agencies; mortgage-backed securities; non-agency residential mortgage-backed securities; and state and municipal securities.

History

Lakeland Financial Corporation was founded in 1872.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
