This sort of company's information will assist and strengthen your

company's decision-making processes.

In the part that describes Lattice, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Lattice, Inc. business.

### **About Lattice, Inc.**

Lattice Incorporated provides engineering services with advanced technology solutions to agencies of the federal government.

### **OPERATIONS**

#### **Government Services**

The Government Services Division provides engineering services coupled with advanced technology solutions to agencies of the federal government. The company has developed advanced data management applications, Internet server technology, and information systems within federal agencies. The company's technology and services helps its customers reduce development time for projects, manage the deployment of applications across the Internet to desktops around the world, and implement military grade security on all systems where the applications are deployed.

The company has designed, developed, and implemented advanced business management applications, integration technologies and enterprise geospatial systems. It supports various operational systems in all of these categories for major organizations and defense commands using Web-based technologies and the consolidation of custom and commercial off-the-shelf software to unite dissimilar applications into integrated

systems. In addition, the company provides network engineering, architectural guidance, database management, expert programming, and functional area expert analysis to its Department of Defense clients. The company provides strategic consulting to support business requirements, change management, and financial analysis and metrics for its major federal customers.

### Aquifer Software

The company develops and markets the Aquifer Application Services Platform, a proprietary software product embedded in the applications developed for its customers. Aquifer helps developers build a new class of software called rich Internet applications. These applications are secure custom or commercial desktop and mobile Windows Forms applications that use the traditional client/server model while exploiting Web Services-based communications over the Internet.

Aquifer is a .NET application platform built on a service-oriented architecture that delivers scalable and secure Web applications to Windows desktop and Windows CE platforms. The company markets Aquifer as both a productivity tool and a secure application platform. Aquifer provides various common service components, including data access; role-based user profiles; flexible security model, including encryption; configuration management; event management; integration gateways; and secure client.

The company markets its Aquifer Application Services Platform to federal government agencies, systems integrators, and independent software vendors that are building Windows rich Internet applications. Aquifer's products, training, and services are focused on the .NET Windows Forms application development market where enterprise IT organizations and systems integrators are tasked with building and managing applications that run on the Internet using the .NET Framework.

### Communications Group

The company supplies call control technology to service providers offering collect calling and prepaid calling to inmates of correctional institutions.

## PRODUCTS

### BubbleLink

BubbleLink is a transaction processing platform that is used to develop and improve various customizable communications applications.

### Nexus Call Control System

The Nexus Call Control System is built on its BubbleLink software architecture. This open source platform is a combination of integrated computer telephony hardware and software. The Nexus Call Control System is capable of handling various call transactions per hour and provides telecom service providers with tools to manage telephone calls. The Nexus can scale handle small to large facilities without sacrificing features or performance.

Nexus call control systems are supported by an integrated array of administrative and investigative programs that provide a management solution suite. All programs interact in real-time with Nexus calls and databases via an Ethernet local area network (LAN) or a wide area network (WAN).

Nexus provides call control and management tools targeted at investigation and law enforcement in the inmate telephone control industry. Nexus includes live monitoring, debit and recording features. The Nexus system can be structured to use pre-paid collect and pre-paid debit cards that support specialized tariffs and call timing. With pre-paid services, Nexus provides control and security.

### MinuteMan

The MinuteMan product, which is also built on its BubbleLink technology, is a turnkey system. The MinuteMan is designed for smaller pre-paid card vendors that want to break free from the resale only mode of the card business.

### SensorView

SensorView, which provides clients with the capability to command, control and monitor multiple distributed chemical, biological, nuclear, explosive, and hazardous material sensors.

### Suppliers

The company's major supplier includes Natural Micro Systems.

## Competition

The company's competitors include Global Tel\*Link and Securus.

## History

The company was founded in 1973 as Science Dynamics Corporation and changed its name to Lattice Incorporated in 2007.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
