pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Law Enforcement Associates Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Law Enforcement Associates Corp. business.

About Law Enforcement Associates Corp.

Law Enforcement Associates Corporation provides surveillance and intelligence gathering products and vehicle inspection equipment. The company manufactures and markets a product line to the worldwide law enforcement, military, security and corrections markets.

The company's products are used by various government and non-governmental agencies, as well as public and private companies. These include military bases, nuclear facilities, embassies, government installations, oil refineries, United Nations and NATO locations. LEA's products have been used at high-profile events, such as the Summer & Winter Olympics, Super Bowl, U.S. Open Golf Championship, and the Democratic and Republican National Conventions.

The company manufactures and distributes a line of audio intelligence gathering equipment, including radio frequency (RF) disguised transmitters, receivers and repeaters for use by law enforcement agencies. In addition, it manufactures a range of video surveillance products ranging from disguised miniature cameras to video transmission and recording systems.

The company partners with various manufacturers in the industry to provide its customers with a line of products. It is the sole U.S. distributor of the All-in-One GPS (Global Positioning System) vehicle tracking system from Coleman Technology. The company markets, sells, and hosts training sessions on site upon purchase. It is a master distributor for items, such as Samsung/ GVI Security Products, FLIR Thermal Imaging Systems for law enforcement, Morovision Night Vision equipment, as well as a host of other fine quality law enforcement equipment manufacturers.

The company's PST and PDT products represent a line of wireless synthesized audio transmitters. These transmitters are available in various covert disguises, tailored specifically for use by law enforcement professionals. These transmitters are designed for use with its Unitel receivers and its audio repeaters.

The company's PSR and PDR products are a line of wireless synthesized audio repeaters. Its digital voice recorders are used either as a complement to its wireless audio or video transmission systems or as an intelligence gathering device. The company's digital voice recorders are offered in a variety of covert disguise packages, specifically designed for law enforcement professionals.

The company's AidVision brand offers various wireless and wired video surveillance and monitoring systems. These video systems include cameras, wireless transmitters and receivers. These systems can be portable or fixed, overt or covert, and attended or unattended. Its PReViewS and PReViewS MN products provide the ability to deploy and stream live video, even from the most remote locations. The Scorpion Mini line offers small overt or covert and self-contained video recording devices.

The company's All-In-One GPS vehicle tracking system provides the ability to conduct vehicle tracking and monitoring. The system provides ability to conduct 'live' tracking or 'historical' tracking.

The company's UVIS (Under Vehicle Inspection System) is used to view the underside of vehicles entering and exiting controlled access points. With the introduction of its UV-ISS (Under Vehicle Inspection Screening Software), the UVIS provides a clear, high contrast, real-time video inspection of the undercarriage of vehicles. License plate, make, model and additional information may be stored along with the image in a computer database for recall and analysis at a later time.

The surveillance vehicle division offers mobile specialty surveillance platforms. It offers

FLIR Thermal Imaging, Night Vision equipment, Peerless handcuff and chains, Tactical Defensive Shields, Samsung CCTV cameras in addition to its audio, video, tracking and UVIS products, which are ideally suited for Corrections and Professional Security markets in addition to law enforcement.

Customers

The primary end users of the company's products are federal, state and local law enforcement agencies, state correctional facilities, U.S. and allied military forces, and select private security personnel.

History

Law Enforcement Associates Corporation was founded in 1972.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
