Abstracts

Layne Christensen Co. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Layne Christensen Co. and its competitors. This provides our Clients with a clear understanding of Layne Christensen Co. position in the [Engineering and Construction Services](#) Industry.

The report contains detailed information about Layne Christensen Co. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Layne Christensen Co.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Layne Christensen Co. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to

profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Layne Christensen Co. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Layne Christensen Co. business.

About Layne Christensen Co.

Layne Christensen Company provides drilling and construction services and related products in markets. It also produces unconventional natural gas for the energy market. The company operates throughout North America, as well as Africa, Australia, Europe and Brazil. The company also operates through its affiliates in South America. Layne Christensen's customers include municipalities, investor-owned water utilities, industrial companies, global mining companies, consulting engineering firms, heavy civil construction contractors, oil and gas companies and, to a lesser extent, agribusiness.

Water Infrastructure

The company provides water systems and water treatment facilities. The company offers, on a bundled basis, a range of design, construction and maintenance services for municipal, industrial and agricultural water and wastewater systems.

The primary services the company provides in the water infrastructure division are:

Water Systems: The company offers its customers every aspect of a water system, including hydrologic design and construction, source of supply exploration, well and

intake construction and pipeline installation. The division provides water services in most regions of the U.S. The company's target groundwater drilling market consists of water wells drilled principally for municipal and industrial customers. The company provides feasibility studies using geophysical survey methods, analyzes the survey results and defines the source, depth and magnitude of an aquifer.

Well and Pump Rehabilitation: The company engages in the rehabilitation of wells and well equipment. The company offers diagnostic and rehabilitation services for existing wells, pumps and related equipment through a network of local offices throughout its geographic markets in the U.S. In addition to its well service rigs, the company has equipment capable of conducting downhole closed circuit televideo inspections.

Water and Wastewater Treatment and Plant Construction: The company serves the needs of its municipal and industrial customers by providing the design and construction of both water and wastewater treatment plants. The company offers water treatment solutions for various groundwater contaminants and impurities, such as volatile organics, nitrates, iron, manganese, arsenic, radium, radon, uranium and perchlorate. These design and construction solutions typically involve proprietary treatment media and filtration methods, as well as treatment equipment installed at or near the wellhead, including chlorinators, aerators, filters, and controls. These services are provided in connection with surface water intakes, pumping stations and groundwater pump stations.

Sewer Rehabilitation: The company provides a range of rehabilitation services through traditional pipeline replacement or trenchless, cured-in-place pipe (CIPP) technologies through its Inliner product line.

Geoconstruction: The company provides geoconstruction services to the heavy civil construction market that are focused primarily on soil stabilization during the construction of highways, dams, tunnels, shafts, water lines, subways, and other civil construction projects. Geoconstruction services are used to modify weak and unstable soils and provide support and groundwater control for excavation. Services offered include cement and chemical grouting, jet grouting, vibratory ground improvement, drain hole drilling, installation of ground anchors, tiebacks, rock bolts, and instrumentation.

Environmental Specialty Drilling: The company offers a range of environmental drilling services including: investigative drilling, installation and testing of monitoring wells to assist the customer in determining the extent of groundwater contamination, installation of recovery wells that extract contaminated groundwater for treatment, which is known

as pump and treat remediation, and specialized site safety programs associated with drilling at contaminated sites.

Mineral Exploration

Together with its Latin American affiliates, the company provides drilling services for the global mineral exploration industry. The company's mineral exploration division cond

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
