## Abstracts

LianDi Clean Technology, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between LianDi Clean Technology, Inc. and its competitors. This provides our Clients with a clear understanding of LianDi Clean Technology, Inc. position in the [Energy](#) Industry.

The report contains detailed information about LianDi Clean Technology, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for LianDi Clean Technology, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The LianDi Clean Technology, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes LianDi Clean Technology, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of LianDi Clean Technology, Inc. business.

### **About LianDi Clean Technology, Inc.**

LianDi Clean Technology Inc., through its subsidiaries, provides downstream flow equipment and engineering services to petroleum and petrochemical companies and other energy companies in China.

#### Principal Products and Services

The company's principal products and services include distributing a range of petroleum and petrochemical valves and equipment, including unheading units for the delayed coking process, as well as providing associated value-added technical services; providing systems integration services; and developing and marketing proprietary optimization software for the polymerization process.

**Enclosed Unheading Units:** A primary method in the refining industry of refining crude oil into gasoline, jet and diesel fuel requires a process known as delayed coking. The company is providing an automated and enclosed process of delayed coking, eliminating exposure risks for the workers involved.

**Distribution & Technical Services:** The company distributes different types of valves and related equipment from manufacturers/suppliers. The company also provides related

value-added technical services to manufacturers and petroleum and petrochemical companies. It provides locally customized technical services for international companies who sell products in China but who do not have local offices. For these companies, the company offers its services by enlisting its engineers on the ground to provide localized services for their products. Its technical services include communicating with the R&D arms of the large Chinese oil companies; verifying and confirming the specification of products; and product inspecting, maintenance and debugging assistance.

**Systems Integration:** The company provides systems integration services for self-control of the chemical production process. This process includes integration of storage operations and transportation of valve instruments from tank farms, as well as providing upgrading services of programmable logic controllers with instrument systems.

**Software:** The company's software helps test the processes by producing data collection, performance analysis, and process optimization indications. Polymerization reaction data collection and analysis software provides production process automation control. The company's software can also be applied to other industries, including the coal and steel industries.

## Customers

The company's major customers are the China National Petroleum Corporation (CNPC) and the China Petroleum and Chemical Corporation (Sinopec).

## Suppliers

The company maintains relationships with, and distributes products for valve and equipment manufacturers, including Cameron; Poyam Valves; Rotork; Perar S.p.A; Kanon Loading Equipment BV; and DeltaValve.

## Competition

The company's competitors include Z&J Technologies GmbH and Honeywell.

## History

LianDi Clean Technology Inc. was founded in 1999.

The above Company Fundamental Report is a half-ready report and contents are

subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
