## Abstracts

Liberty Star Uranium & Metals Corp. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Liberty Star Uranium & Metals Corp. and its competitors. This provides our Clients with a clear understanding of Liberty Star Uranium & Metals Corp. position in the [Metals and Mining](#) Industry.

The report contains detailed information about Liberty Star Uranium & Metals Corp. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Liberty Star Uranium & Metals Corp.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Liberty Star Uranium & Metals Corp. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Liberty Star Uranium & Metals Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Liberty Star Uranium & Metals Corp. business.

### **About Liberty Star Uranium & Metals Corp.**

Liberty Star Uranium & Metals Corp., an exploration stage company, engages in the acquisition and exploration of mineral properties in the states of Arizona and Alaska. The company focuses on the exploration of uranium, copper, gold, molybdenum, silver, and zinc properties.

#### Properties

The company's claims in the state of Alaska are held in the name of its wholly-owned subsidiary, Big Chunk Corp. Claims in the state of Arizona are held in the name of the company.

**North Pipes Super Project (NPSP):** The company holds a 100% interest in 1,775 federal lode mining claims placed approximately 60 square miles on the Colorado Plateau Province of northern Arizona. The 1,775 federal lode mining claims include approximately 300 breccia pipe targets (Pipes). Breccia pipes are cylindrical formations in the Earth's crust, identified by a surface depression, and containing a high concentration of fragmented rock breccia cemented by uranium and other minerals.

Elle Venture with XState Resources Ltd (XState): The company holds a 50% interest in federal lode mining claims covering 3 breccia pipe targets at the North Pipes Super Project location through the Elle Venture, a general partnership with XState Resources Limited (XState).

Bonanza Hills Project (Bonanza Hills): The company holds 56 mineral claims covering approximately 13.5 square miles in Southwestern Alaska approximately 40 miles northeast of the northern boundary of the Big Chunk claims.

Big Chunk Super Project (Big Chunk): The company holds a 100% interest in 707 mineral claims covering approximately 177 square miles in the Iliamna region of Southwestern Alaska, located on the north side of the Cook Inlet, approximately 265 miles southwest of the city of Anchorage, Alaska.

East Silver Bell: The company holds an option to explore 26 standard federal lode mining claims located at the East Silver Bell region of Arizona. The mineral claims are owned by FOJ, LLC, an Arizona Limited Liability Company.

Walnut Creek: The company holds an option to explore 33 standard federal lode mining claims located due east and southeast of the town of Tombstone, Arizona. The mineral claims are owned by FOJ, LLC, an Arizona Limited Liability Company.

## Dispositions

In February 2010, the company sold its drilling assets owned by Redwall Drilling Inc.

## History

The company was founded in 2001. It was formerly known as Titanium Intelligence, Inc., and changed its name to Liberty Star Gold Corp. in 2004. Further, the company changed its name to Liberty Star Uranium & Metals Corp. in 2007.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
