## Abstracts

Linc Energy Ltd. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Linc Energy Ltd. and its competitors. This provides our Clients with a clear understanding of Linc Energy Ltd. position in the [Energy](#) Industry.

The report contains detailed information about Linc Energy Ltd. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Linc Energy Ltd.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Linc Energy Ltd. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Linc Energy Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Linc Energy Ltd. business.

### **About Linc Energy Ltd.**

Linc Energy Limited engages in the development and commercialization of coal to liquids (CTL) processes through the combined utilization of underground coal gasification (UCG) and gas to liquids (GTL) technologies primarily in Australia and Uzbekistan.

**Arckaringa Basin:** The nine exploration wells would seek to evaluate the UCG potential of Linc Energy's Arckaringa tenements through testing and gathering of relevant geological data, including geophysical, geotechnical, and hydrogeological information.

**Biloela:** The drilling of a preliminary four hole program was completed in March 2009.

**Chinchilla:** Linc Energy's Chinchilla project area consists of Mineral Development Licence (MDL) 309, EPC 635, and EPC 897. From June to December 2008, a significant drilling program was undertaken and consisted of 26 chip holes and 30 core holes.

**Dalby:** Drilling in Linc Energy's Dalby tenements (MDL 371a) concluded in December 2008.

**Emerald:** In June 2008, Linc Energy undertook an exploration drilling program in EPC 980, 1226 and 1267, referred to as the 'Teresa Project'. Linc Energy's total exploration for the Teresa Project has consisted of 47 chip holes and 34 core holes for a total of 21,097 metres drilled.

**Galilee:** In May 2009, Linc Energy began an initial 24 core hole drilling program in the Galilee Basin in the area covered by MDL application 372.

**Pentland:** Linc Energy is the holder of EPC 526 and applicant for MDL 361a, covering an area of approximately 30 square kilometres, 13 kilometres south-west of Pentland, in the Galilee Basin. In 2008, Linc Energy drilled 7 holes.

**Walloway Basin:** Linc Energy gained access to exploration tenements in the tertiary age Walloway and St Vincent Basins in South Australia through PEL 120.

**United States:** In May 2009, Linc Energy signed a purchase agreement to acquire 94 Wyoming state coal leases. These leases contain approximately 92,000 acres of Powder River Basin tenements.

**Vietnam:** The company is working on the trial UCG Tonkin Project, which is a collaboration between VINACOMIN (Vietnam National Coal Minerals Industries Group), Marubeni Corporation (a Japanese company), and Linc Energy.

**Yerostigaz:** Linc Energy holds a 72.9 per cent majority controlling share in the only commercial UCG plant in the world.

## Acquisitions

In October 2008, the company acquired 100% of SAPEX Limited, which holds petroleum tenements in South Australia.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. ## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
