About Linedata Services SA

Linedata Services S.A. offers information technology solutions to financial service industries worldwide. The company primarily offers packaged software solutions, systems integration, and application service provider solutions.

The company offers international financial institutions with various software applications, which cover various aspects of the investment process. Through its Facilities Management, the company manages IT hardware and administration at the client's site. With the ASP (Application Service Provider) model, the company hosts a remotely-accessible application platform, including hardware and infrastructure, technical operation, functional maintenance, updates, telecommunications management and other services, representing outsourcing, all entrusted to its group.

The company offers front, middle and back-office solutions designed for the global buy-side community. Its solutions provide coverage for savings, retirement, life and contingency to meet the IT needs of financial organizations and companies. From consumer credit to syndicated loans, the company, through its EKIP and UNILOAN software solutions, provides coverage to meet the needs of international financial institutions.

Liquidity Alliance Program: This program allows direct access from the LongView Trading desk to the major electronic stock exchanges and sell-side algorithmic trading tools.

Longview LyNX: This enables LongView Trading users to benefit from connectivity to the sell-side through the FIX format. Network infrastructures and software maintenance are managed by a single point of contact, the company, enabling negotiations between sell-side and buy-side communities to be optimized by overcoming IT constraints.

Customers

Asset Management: The company works closely with approximately 800 investment companies in all the global financial marketplaces on a day-to-day basis, covering all the various forms of collective, institutional and, alternative forms of asset management.

Savings & Insurance: The company works together with approximately 100 client organizations, covering all forms of individual and collective savings, long or short term, offered by banking establishments, insurance companies and major corporates on the French market. The company's customers also include Account Registrars and Unit Custodians, who are authorized French establishments, most often subsidiaries of banks or insurance companies that use Linedata Services solutions for the administrative and accounting management of all company savings schemes for employee beneficiaries. It also offers its services to Mutuals and subsidiaries of major insurance groups, which use Linedata Services life insurance policy management solutions. The company also offers its services to major industrial groups and service companies.

Leasing & Credit Finance: The company's customers include specialized establishments and banking group subsidiaries, for which the company supports in their businesses of equipment leasing, vehicle financing and consumer credit, on a national or European basis. It also offers its services to financial subsidiaries and industrial developers, who use the company's IT solutions to offer all forms of financing around industrial assets originating from their parent company: cars, industrial vehicles, IT equipment. In addition, the company offers its services to banking establishments and investment banks.

Strategic Alliances

Linedata Services SA, in March 2009, had formed a strategic partnership with UAT to

provide pre-and post-trade compliance, real-time reporting, and brokerage cost savings system for sub-advised investment platforms.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
