Abstracts

Liska Biometry Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Liska Biometry Inc. and its competitors. This provides our Clients with a clear understanding of Liska Biometry Inc. position in the Industry.

The report contains detailed information about Liska Biometry Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Liska Biometry Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Liska Biometry Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Liska Biometry Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Liska Biometry Inc. business.

About Liska Biometry Inc.

Liska Biometry, Inc. develops fingerprint biometric solutions enabling fast individual authentication, precise identification searches, and cross-platform data interoperability.

The company's technology generates a short, repeatable, numerical identifier from an individual's fingerprint. This short number becomes a precise and universal biometric identifier number (BIN) capable of being embedded in credit cards, driver's licenses, travel documents such as visas and passports, and a host of other personal identification credentials. Its technology allows for integrated identification searches across disparate databases at all levels of government and law enforcement.

The company's fingerprint biometric software solutions enable identification of individuals in large ID management systems and disparate legacy databases. Its offerings can be used for National ID Card Programs, Secure Identification Documents (Visas, Passports), Transaction Authentication (ATMs, Credit Cards), and Controlled access to secure areas and networks.

PRODUCTS

The BIN 1.0 Descriptor Authentication Software

The company's BIN Descriptor Authentication Software is a means of delivering its patent-pending fingerprint Biometric Identifier Number Algorithm as an integrated software solution that can be retrofitted to existing hardware and IT infrastructure deployments for 1:1 biometric authentication and 1:N database search. The BIN Descriptor Authentication Algorithm is a software application that is licensed to original equipment manufacturers, systems integrators and value added resellers for use within their existing security infrastructure solution or integrated as part of a new application solution.

The BIN 1.0 Descriptor Enrollment Software

The Company's BIN Descriptor Enrollment Software is a means of delivering its patent-pending fingerprint Biometric Identifier Number Algorithm as an integrated software solution that can be retrofitted to existing hardware and IT infrastructure deployments for biometric and credential enrollment, token generation and database population, with 1:N database watch list search functionality. The BIN Descriptor Enrollment Algorithm is a software application that is licensed to original equipment manufacturers, systems integrators, and value added resellers for use within their existing security infrastructure solution or integrated as part of a new application solution.

The BIN 1.0 Database Management Software

The company's BIN Database Management Software is a means of delivering its patent-pending fingerprint Biometric Identifier Number Algorithm as an integrated software solution that can be retrofitted to existing hardware and IT infrastructure deployments for centralized BIN based ID management and legacy database interoperability functionality. The BIN Database Management Algorithm is a software application that is licensed to original equipment manufacturers, systems integrators, and value added resellers for use within their existing security infrastructure solution or integrated as part of a new application solution.

ID Management Hardware, Supplies and Services

The company offers ID Card design software, printer hardware, camera hardware and software, accessories and supplies and services to support the sold products. It offers a catalog of products, supplies and services for customers with ID management requirements.

Acquisition

In June, 2006, the company acquired Digital Card Systems, Inc. and its affiliates, DCS Europe, Inc., and Cosmo ID GmbH (DCS). DCS is a developer of security and ID management solutions for government credentials. In June, 2006, the company acquired Markow Photo Properties in Phoenix, Arizona, consisting of the companies Al-Cor Identification Systems, Colormark Inc. and Photomark Inc.

Geographic Markets

The company operates in North America, Europe, Africa, South America, the Middle East and Asia.

Target Markets

The company's target markets include all branches of the United States military; Federal Bureau of Investigation; Office of Homeland Security; Immigration and Naturalization Service; Local police and sheriff's departments; Department of Defense Biometrics Management Office; United States Army Communication Electronics Command; National Security Agency; Justice Department Management Office; Airport authorities; State corrections departments; State judiciary departments; Education departments; State Probation and Parole department; Corporations with ID Management requirements; Financial institutions; Transportation Industry; Childcare; Securities and gaming agencies; and Large retail organizations.

Customers

The company's customers include Departments of State, National and Regional Passport Offices, National and State Departments of Motor Vehicle, State and Private Universities, Regional and Local School Districts, Large corporations, and Small businesses.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
