Abstracts

LMI Aerospace Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between LMI Aerospace Inc. and its competitors. This provides our Clients with a clear understanding of LMI Aerospace Inc. position in the [Aerospace and Defense](#) Industry.

The report contains detailed information about LMI Aerospace Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for LMI Aerospace Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The LMI Aerospace Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes LMI Aerospace Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of LMI Aerospace Inc. business.

About LMI Aerospace Inc.

LMI Aerospace, Inc. provides design engineering services, structural assemblies, kits, and components to the aerospace, defense, and technology markets. The company provides a range of manufacturing capabilities and value-added services to the commercial, corporate, regional and military aircraft markets. It also provides prototyping and design capabilities to customers to support new product development and in-service aircraft.

Segments

The company operates in two segments, Aerostructures Segment and Engineering Services Segment.

Aerostructures Segment

Through its Aerostructures segment, the company fabricates, machines, finishes, integrates, assembles, and kits formed, close tolerance aluminum and specialty alloy components and sheet metal products primarily for commercial, corporate, regional, and military aircraft. The company manufactures approximately 30,000 products for integration into various aircraft platforms manufactured by original equipment

manufacturers (OEMs) and Tier 1 aerospace suppliers, including Gulfstream Aerospace Corporation, Spirit AeroSystems, Aviation Partners Boeing, Vought Aircraft Industries, Sikorsky Aircraft Corporation, The Boeing Company, and Bombardier, Inc.

The company's primary aerospace products include wing slats and flapskins; winglets and related wing modification kits; fuselage and wing skins; helicopter cabin and aft section components and assemblies; wing panels; door components, assemblies and floorbeams; thrust reversers and engine nacelles/cowlings; cockpit window frames and landing light lens assemblies; detail interior components; structural sheet metal and extruded components; auxiliary power units; tailcone assemblies; housings and assemblies for gun turrets; and various components and assemblies.

The company also offers its customers value-added services related to the design, production, assembly and distribution of aerospace components and deliver kits of products directly to customer points of use. These services include fabrication; machining; finishing; assembly; kitting; and distribution.

With the addition of Everett, Washington-based Integrated Technologies, Inc. (Intec), the company provides advanced materials testing, manufacturing and design services to the aerospace, defense and transportation industries. Intec's primary business is designed to support composite testing, manufacturing and research by analyzing new and existing materials, including organic matrix composites, ceramics, metal matrix composites, and metal.

Engineering Services Segment

The Engineering Services segment, operated by D3 Technologies, Inc., provides a range of design, engineering, and program management services, supporting aircraft lifecycles from conceptual design, analysis and certification through production support, fleet support and service life extensions via a turnkey engineering solution, including structural design and analysis; systems design and integration; tool design and fabrication; certification planning and support; logistics and fleet maintainability; complex program management support; and avionics and tactical software development.

History

LMI Aerospace, Inc. was founded in 1948.

The above Company Fundamental Report is a half-ready report and contents are

subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
