Such information creates your awareness about principal trends of LSB Financial Corp. business.

About LSB Financial Corp.

LSB Financial Corp. operates as the holding company for Lafayette Savings Bank, FSB, which provides a range of banking and financial services primarily in Indiana. The company owns a service corporation, L.S.B. Service Corporation.

The company's principal business consists of attracting retail deposits from the general public and investing those funds primarily in permanent first mortgage loans. The company serves Tippecanoe county, Indiana and its eight surrounding counties, through its five retail banking offices.

Lending Activities

The company's principal lending activity is the origination of conventional mortgage loans for the purpose of purchasing, constructing, or refinancing owner-occupied one- to four-family residential real estate located in its primary market area. It also originates non-owner occupied one- to four-family residential, multi-family and land development, commercial real estate, consumer, and commercial business loans.

One- to Four-Family Residential Real Estate Lending: The company's lending program focuses on the origination of permanent loans secured by mortgages on owner-

occupied, one- to four-family residences. It also originates loans secured by non-owner occupied and one- to four-family residences.

Multi-Family and Commercial Real Estate Lending: The company originates permanent loans secured by multi-family and commercial real estate. Its permanent multi-family and commercial real estate loan portfolio includes loans secured by apartment buildings, office buildings, churches, warehouses, retail stores, restaurants, shopping centers, small business facilities, and farm properties, which are located within its primary market area.

Construction, Land and Land Development Lending: The company makes construction loans to individuals for the construction of their residences, as well as to builders and developers for the construction of one- to four-family residences, multi-family dwellings, and commercial real estate projects. Construction loans to builders of one- to four-family residences generally have terms of six to eight months and require the payment of interest only at a fixed rate for the loan term. It also makes loans to builders for the purpose of developing one- to four-family lots and residential condominium projects.

Consumer Lending: The company originates various types of consumer loans, including home equity loans, direct automobile loans, home improvement loans, deposit account loans, and other secured and unsecured loans for household and personal purposes.

Commercial Business Lending: The company's commercial business lending activities encompass secured and unsecured lines of credit and loans secured by small business equipment and vehicles.

Investment Activities

The company's investment portfolio includes the U.S. government securities, investment grade municipal and corporate bonds, commercial paper, federal agency obligations, and interest-bearing deposits with the Federal Home Loan Bank.

Deposits

The company offers various deposit accounts consist of statement savings accounts, money market accounts, NOW accounts, and certificate accounts. In addition, it solicits broker originated certificates of deposit.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
