Abstracts

Lundin Mining Corporation Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Lundin Mining Corporation and its competitors. This provides our Clients with a clear understanding of Lundin Mining Corporation position in the Industry.

The report contains detailed information about Lundin Mining Corporation that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Lundin Mining Corporation. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Lundin Mining Corporation financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Lundin Mining Corporation competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Lundin Mining Corporation business.

About Lundin Mining Corporation

Lundin Mining Corporation operates as a diversified base metals mining company. The company has operations in Portugal, Spain, Ireland and Sweden. It has three material mines in operation producing copper, nickel, lead and zinc.

The company also holds an equity interest in the Tenke Fungurume Project in the Democratic Republic of Congo (DRC), and is undertaking expansion programs at its Neves-Corvo and Zinkgruvan mines. The company also holds an exploration portfolio and interests in exploration ventures.

Operating Mines

Neves-Corvo Mine: The Neves-Corvo mine, operated by the local Portuguese company Somincor, is situated approximately 220km southeast of Lisbon in the Alentejo district of southern Portugal. The mine site lies approximately 15km south east of the town of Castro Verde and exploits five major orebodies from an underground mine. The concession provides the rights to exploit the Neves-Corvo deposits for copper, zinc, lead, silver, gold, tin and cobalt for an initial period of fifty years with two further extensions of twenty years each.

Zinkgruvan Mine: The Zinkgruvan mine is located approximately 200km west of Stockholm in south-central Sweden. The mine site is approximately 15km from the town of Askersund and comprises a deep underground mine, a processing plant and associated infrastructure and tailings disposal facilities. The mining operations are contained within two exploitation concessions covering the deposit and its immediate area. In addition, the mine currently holds exploration concessions in the area totaling 8,598ha.

Aguablanca Mine: The Aguablanca mine is located approximately 100km north of Seville in the Extremadura region of southern Spain. The mine lies approximately 30km south of the town of Monesterio, and comprises an open pit mine, processing plant and associated waste and tailings management facilities. Concentrates from the mine are trucked to the port of Huelva for onward shipping to customers. The mining rights for Aguablanca are covered under a Reserva Definitiva a Favor del Estado called La Moneguera which consists of 95 contiguous claims covering an area of 2,862 ha. Lundin Mining holds exploration rights over an area of 2,521 square kilometers, largely to the north and west of Aguablanca, known as the Ossa Morena.

Other Mines

Galmoy Mine: The Galmoy zinc-lead mine is located in south-central Ireland in County Kilkenny. Galmoy is an underground mine with most of the workings between 100m and 160m below surface.

Storliden Mine: The Storliden zinc-copper mine is located in the Skelefte District of northern Sweden.

Projects

Tenke Fungurume Project: TFM's copper-cobalt deposits comprise copper-cobalt resources. The deposits are located on contiguous concessions which total 1,437 square kilometers. These concessions are located in Katanga Province, DRC, approximately 175 km northwest of Lubumbashi.

Salave Project: Salave is an undeveloped, near-surface gold deposit located in Asturias, in northern Spain.

Ozernoe Project: The company holds a 49% interest in the Ozernoe zinc-lead project deposit which is located 200km east of Lake Baikal in the Russian Republic of Buryatia.

History

Lundin Mining Corporation was founded in 1994. The company was formerly known as South Atlantic Ventures, Ltd. and changed its name to Lundin Mining Corporation in 2004.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
