Abstracts

Lupatech S.A. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Lupatech S.A. and its competitors. This provides our Clients with a clear understanding of Lupatech S.A. position in the [Heavy Machinery](#) Industry.

The report contains detailed information about Lupatech S.A. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Lupatech S.A.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Lupatech S.A. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Lupatech S.A. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Lupatech S.A. business.

About Lupatech S.A.

Lupatech S.A. engages in the production and sale of equipment and rendering of services for the oil and gas industry, industrial valves, and microcasting parts primarily in Brazil and Argentina.

Segments

The company operates in three business segments: Energy Products, Flow Control, and Metallurgy.

Energy Products

The Energy Products segment offers products and services for the oil and gas industry, such as anchorage ropes for deepwater platforms, manual and automated valves for use in applications of exploitation, production, transportation, and oil refining and hydrocarbon chain, equipment for completion of oil wells allowing oil and gas production, linings of drilling and production pipes, equipment lease and offshore services, natural gas compressors, and sensors by optic fiber and leasing of gas compression kits through the 'MNA', 'CSL Off Shore', 'Petroíma', 'Esferomatic', 'Gasoil', 'K&S', 'Fiberware', 'Aspro', 'Gavea Sensors', 'Sinergás', and 'Tecval' brands.

Flow Control

The Flow Control segment engages in the manufacture and sale of industrial valves, mainly for the chemical, pharmaceutical, pulp and paper, food, civil construction and machine and equipment industries, through the 'Valmicro', 'Mipel', 'ValBol', and 'Jefferson' brands.

Metallurgy

The Metallurgy segment engages in the development and manufacture of parts, complex parts, and subassemblies targeted mainly at the international automobile industry through precision casting and steel injection processes in Latin America. The company also operates in the casting of corrosion-resistant metal alloy parts, targeted at the industrial valves and pumps sectors, mainly for applications in oil and gas industry processes, through the 'Itasa', 'Steelinject', and 'Microinox' brands.

Acquisitions

In December 2008, the company acquired 100% of the capital stock of Tecval S/A Válvulas Industriais, which manufactures gate, globe and check valves, and forged ball valves to the oil and gas, petrochemical, chemical, pulp and paper, mining, and nuclear sectors.

In July 2008, the company acquired 100% of the capital stock of Sinergas GNV do Brasil Ltda., which provides services of natural gas compression (equipment rental) and maintenance of compressors for vehicle use.

In July 2008, the company also acquired 100% of the capital stock of Gavea Sensors Sistemas de Medicao Ltda., which manufactures fiber optic sensors.

In November 2008, the company acquired 100% of the capital stock of Fiberware Equipamentos e Serviços para Indústria Ltda., which manufactures internal and external pipe coating.

In January 2009 the company acquired Norpatagonica S.R.L., which is a service provider in the oil and gas sector. It has its own operational base duly structured with the purpose of giving support to oil companies in maintaining the level of oil and gas production through providing services of well intervention. It also carries out hydraulic

tests, well cleaning with its own tools and supplies injection, repositioning, and low- and high-pressure pumping equipment.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
