Such information creates your awareness about principal trends of Macquarie Group, Ltd. business.

About Macquarie Group, Ltd.

Macquarie Group Limited provides banking, financial, advisory, investment, and funds management services worldwide.

Segments

The company operates in five groups and two divisions, including: Macquarie Capital, Treasury and Commodities, Macquarie Securities Group, Banking and Financial Services, Macquarie Funds Group, Corporate and Asset Finance Division, and Real Estate Banking Division.

Macquarie Capital

Macquarie Capital includes the company's corporate advisory, equity underwriting and specialized funds management businesses. Macquarie Capital Advisers provides advisory and capital raising services to corporate and government clients involved in public mergers and acquisitions, private treaty acquisitions and divestments, debt and equity fund raising and corporate restructuring. Advisory activities are aligned into industry groups, reflecting key areas of expertise in infrastructure and utilities, resources, telecommunications, media, entertainment and technology (TMET), real

estate, industrials and financial institutions. Macquarie Capital Advisers also encompasses Macquarie Capital Funds which manages a range of specialist funds, including infrastructure and real estate funds.

Treasury and Commodities

Treasury and Commodities Group conducts trading, financing and related activities in a range of financial and commodity markets with a focus of client service provision. Underlying services encompass foreign exchange, debt and futures, as well as dealing in agriculture, environmental, freight, energy and metals markets.

The Energy Markets Division provides risk management solutions to producers, consumers and investors in the energy sector across a range of energy products and acts as a trading intermediary in gas and power in the U.S. and Europe.

The Foreign Exchange Division provides 24-hour interbank FX services in all currency pairs to institutional clients in Australia and globally and accesses retail FX volumes through service provision to retail platforms and investment in those platforms.

The Metals and Energy Capital Division provides equity and debt finance globally to the metals and energy sector, as well as providing trading and hedging services to the base and precious metals sectors.

Agricultural Commodities and Investor Products Division provides risk management, structured financing and physical commodity solutions across agricultural commodities globally and selected dry and wet freight routes.

The Futures Division provides a range of broking and clearing services for Australian and international futures exchanges. The division provides these services in the Australian market and is selectively pursuing opportunities in offshore markets.

The Debt Markets Division arranges and places primary market debt for clients and provides secondary market liquidity in government, inflation-linked, corporate, global, mortgage and asset-backed securities.

Central Division is an incubator for various non-division-specific, early-stage or cross-divisional initiatives. This includes Environmental Financial Products, the U.S. based Credit Trading, Emerging Markets and the management of joint ventures and alliances.

Macquarie Securities Group

Macquarie Securities Group includes equity-linked investments, trading products, risk management services, equity finance, arbitrage trading and synthetic products as well as a full service institutional cash equities broker in the Asia- Pacific region and specialized in the rest of the world. It provides an Equity Capital Markets service through a joint venture with Macquarie Capital Advisers.

The Cash Division operates as a full-service institutional cash equities broker in the Asia-Pacific region. In the rest of the world it operates as a specialized institutional cash equities broker. It provides Equity Capital Markets products and services through a joint venture with Macquarie Capital Advisers.

The Delta1 Division combines the Group's equity finance, arbitrage trading and synthetic product businesses. The division services institutional and hedge fund clients across a range of markets through a variety of products and services

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
