The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Mag Silver Corp. business.

About Mag Silver Corp.

MAG Silver Corp., an exploration stage company, engages in the acquisition, exploration, and development of properties located in the Mexican Silver Belt.

Properties

The company's three material properties are its 44% joint venture interest in the Juanicipio property; the 100% owned Cinco de Mayo property; and the 100% owned Lagartos (NW and SE) property.

Juanicipio Property

The Juanicipio property covers approximately 7,679 hectare (18,967 acres) and is located in Zacatecas State, Mexico, just outside the mining town of Fresnillo. The Juanicipio property is host to a significant discovery of a high grade silver, gold vein. A total of 8,441 meters of diamond drilling, in 11 holes, was completed on the Valdecañas Vein and 7,801 meters, in 9 holes, on the Juanicipio Vein in 2009.

Cinco de Mayo Property

The Cinco de Mayo property is located approximately 190 kilometers northwest of the city of Chihuahua, in northern Chihuahua State, Mexico. Cinco de Mayo is a 5,000 hectare carbonate replacement deposit (CRD) prospect located in Chihuahua State.

Lagartos Property

The Company has acquired a 100% interest in exploration concessions on the Fresnillo Silver Trend to the northwest and southeast of the Juanicipio property. The two main claim groups comprising 135,000 hectares are known as Lagartos NW and Lagartos SE, northwest and southeast of the Juanicipio Joint Venture.

Other Properties

The company has various other exploration properties. It is focused primarily on epithermal vein exploration along the Fresnillo Silver Trend and on CRD exploration along the western edge of the Chihuahua Trough.

San Ramone: In July, 2009, the company optioned, from Castle Resources, the San Ramone property adjoining Lagartos SE located in the historic Mala Noche silver vein system.

Salemex Property: The Salemex property comprises 3 claim blocks covering 8,663 hectares in the state of Chihuahua.

Nuevo Mundo: The Nuevo Mundo property is in the eastern Zacatecas State and is geologically located along the structural trend known to host CRDs and its CRD projects (Sierra Ramirez, Guigui, and Cinco de Mayo).

La Lorena: The La Lorena property is located north of the Guanajuato Silver Mining District within the Fresnillo Silver Trend.

History

The company was founded in 1999. It was formerly known as Mega Capital Investments, Inc. and changed its name to MAG Silver Corp. in 2003.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need

2-3 days to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
