Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Management Consulting Group plc business.

## **About Management Consulting Group plc**

Management Consulting Group plc provides management consulting services. The company provides two consulting offerings: Proudfoot Consulting and Parson Consulting.

### **Proudfoot Consulting**

The company's proudfoot consulting offerings helps clients to achieve significantly increased profitability through the implementation of operational improvements to increased sales, lower operating and overhead costs, greater output and lower capital expenditure. Proudfoot Consulting's appeal is to operationally focus on senior managers intent on executing strategy and achieving stretching goals. The company's proudfoot consulting offers its services mainly in the North America, and Europe.

Clients: Proudfoot Consulting clients include Anglo American, Avaya, BP, National Australia Bank, Newmont Mining, Nissan, PSA Peugeot-Citroën and Societe Generale.

### **Parson Consulting**

The company's parson consulting is a financial management consultancy. It is free of auditing conflicts and provides Sarbanes-Oxley compliant services. It has four service lines: governance and risk management, operational financial management, strategic financial management and transaction support. Parson Consulting's appeal is to Chief Financial Officers intent on achieving the highest standards of financial management. The company provides services from 14 offices across the United States, Europe and Asia Pacific.

Parson Consulting assists Chief Financial Officers to provide financial information and insight to shareholders through strategic finance, accounting and finance operations, governance and risk management, and corporate transactions support. It improves clients' management decision making through business process improvements, business systems optimisation, and project management.

The company also provides services that auditors are prohibited or discouraged from supplying under the Sarbanes-Oxley Act and other similar regulations and guidance, often with preferred supplier status.

Clients: Parson's clients include Ameriquest Mortgage, Avis, Barclays, BP, BOC Group, Citigroup, Ecolab, Federal Home Loan Bank, Ford, General Mills, Kingfisher, Lawson, Shell, Tomkins, Trustmark and Warner Bros.

## Markets

The company markets its products and services principally in Canada, Great Britain, Germany, France, Austria, Spain, South Africa, Switzerland, New Zealand, Hong Kong, and USA.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
