pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Manhattan Associates, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Manhattan Associates, Inc. business.

About Manhattan Associates, Inc.

Manhattan Associates, Inc. develops, sells, deploys, services, and maintains supply chain software solutions. The company's solutions consist of software, services and hardware, which coordinate people, workflows, assets, events and tasks holistically across the functions linked in a supply chain from planning through execution. These solutions also help coordinate the actions, data exchange and communication of participants in supply chain ecosystems, such as manufacturers, suppliers, distributors, trading partners, transportation providers, channels (such as catalogers, store retailers and Web outlets) and consumers.

Manhattan Associates' Software Solution Portfolios

The company's solutions operate across Unix, IBM System I, Linux and Microsoft.NET computing platforms, as well as on multiple hardware platforms and systems. It provides adapters for ERP systems, including Oracle, SAP, and Microsoft Dynamics AX. The company also offers certain of its solutions in both premise software and hosted Software-as-a-Service (SaaS) models so that customers can select the option that meets their requirements for control, flexibility, cost of ownership, and time-to-deployment.

Manhattan SCOPE

SCOPE is suited for companies that consider supply chain software, processes and technology strategic to market leadership.

Supply Chain Platform Applications

SCOPE Platform Applications span the entire portfolio to provide key visibility, intelligence and adaptive functionality across the enterprise. These solutions offer the supply chain insight and analytics that are critical to an executive's ability to proactively manage the holistic supply chain.

Supply Chain Solution Suites

Each Solution Suite is designed to enable users to proactively plan, monitor and execute against supply chain objectives.

Planning and Forecasting: It enables organizations to sense and respond to demand, and to support all levels of enterprise merchandise planning, from strategic level planning down to assortment and key item planning. The company's Demand Forecasting solution utilizes a Unified Forecasting Method (UFM), including forecasting buying patterns for seasonal items, intermittently sold items, and items that sell in different patterns and at different paces in different channels.

Inventory Optimization: It enables enterprises to reduce overall network inventory to release working capital and improving sales and customer order fill rates. Inventory Optimization also provides analytical tools to better balance the financial trade-off between improving customer service levels and overall inventory investments. The company's Multi-Echelon solution helps organizations manage distribution networks with one type or level of distribution center between the supplier and the end point.

Order Lifecycle Management: It is designed to optimize order fulfillment across a distributed supply chain.

Transportation Lifecycle Management: It optimizes various aspects of transporting product through supply chains by improving multiple product delivery dimensions, such as speed, accuracy and cost.

Distribution Management: It is designed to manage the key assets required to run distribution operations, and to move goods and information through a warehouse with precision and velocity.

X-Suite Solutions

X-Suite Solutions utilizes Manhattan's SCPP to synthesize capabilities of two or more solutions or solution components to solve a specific supply chain problem. Flow Management and Extended Enterprise Management are X-Suite Solutions. Flow Management synthesizes Demand Forecasting, Replenishment, Supply Chain Visibility, Distributed Order Management and Warehouse Management, and Extended Enterprise Management synthesizes Supplier Enablement, Hub Management, Transportation Enablement, Store / Consumer Gateway, Collaborative Gateway, Supply Chain Visibility and Supply Chain Event Management.

Flow Management: Flow Management enables organizations to evolve from a facilities-based distribution model to a holistic, network-based model.

Extended Enterprise Management: It connects organizations with supply chain ecosystem participants to c

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
