## Abstracts

ManTech International Corporation Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between ManTech International Corporation and its competitors. This provides our Clients with a clear understanding of ManTech International Corporation position in the [Software and Technology Services](#) Industry.

The report contains detailed information about ManTech International Corporation that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for ManTech International Corporation. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The ManTech International Corporation financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes ManTech International Corporation competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of ManTech International Corporation business.

## **About ManTech International Corporation**

ManTech International Corporation provides technologies and solutions for national security programs for the Intelligence Community, the Departments of Defense, State, Homeland Security, and Justice; the Space Community; National Oceanic and Atmospheric Administration (NOAA); and other U.S. federal government customers. It operates in the United States and approximately 40 countries worldwide.

### **Solutions and Services**

The company delivers information technology, technical and other services and solutions for mission-critical, enterprise information technology and communication systems, primarily in support of national security programs for the Intelligence Community and Department of Defense. The company's solutions include various service offerings, often delivered in combination over an extended period of time in support of long-term programs, including systems engineering and integration; enterprise architecture (design, review and implementation); cyber security/information assurance (security architecture, computer forensics, intrusion detection, penetration testing and cyber threat analysis); intelligence operations and analysis support; network

and critical infrastructure protection; information operations and information warfare support; information technology; communication integration; global logistics & supply chain management; and service oriented architecture.

The company's offerings fall into three basic categories, such as Mission Support; Systems Engineering; and Technical Services.

### Mission Support

**Cyber Security—Computer Network Attack, Exploitation and Defense:** The company's team of security experts tackles cyber security problems, such as identifying and neutralizing state sponsored cyber attacks, managing security operations centers, developing insider threat detection programs, and creating enterprise vulnerability management programs. It provides cyber warfare and cyber defense security solutions and services to the Department of Defense, agencies in the Intelligence Community, Department of State and Department of Justice. Its solutions also support mission areas, such as computer forensics, cyber threat analysis, computer crimes investigations, security operations center management and specialized training in information assurance, cyber security, computer forensics, and computer network operations. The company performs services in the areas of data mining analysis, atypical data recovery techniques and data extraction. The company developed and staffs a national level computer forensic laboratory and provides a range of subject matter expertise, including reverse engineering and code analysis; forensic signature creation, detection and analysis; damaged media recovery; hidden data processing; protected data processing; forensic software development; and custom training development and implementation.

**Secure Information Sharing and Collaboration:** The company applies engineering experience and solutions to facilitate collaboration and information sharing to meet Department of Defense and Intelligence Community security requirements.

**Mission Enabling Solutions:** The company designs, develops, implements, tests, Web-enable and maintains security applications for its customers' information systems and network infrastructures. It provides e-commerce services, including Web development efforts that focus on designing and maintaining scalable, interoperable, and portable information management solutions. It developed a analytic environment that provides access to regional, national and international information with appropriate security level access controls, providing direct operational support to time-sensitive counterterrorism activities in support of an Intelligence Community customer.

**Enterprise Systems Engineering:** The company provides network architecture planning and implementation services and systems engineering services in support of enterprise-wide network infrastructures and components that include LAN/WAN architectures, messaging architectures, network management solutions, directory services architecture, and Web hosting.

**Service Oriented Architectures:** The company p

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

### **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

### **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
