Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Markel Corp. business.

About Markel Corp.

Markel Corporation markets and underwrites specialty insurance products and programs to various markets.

The company targets various markets that include wind and earthquake exposed commercial properties, liability coverage for specialized professionals, horse mortality and other horse-related risks, accident and medical coverage for students, yachts and other watercraft, motorcycles, and marine and energy related activities.

Segments

Excess and Surplus Lines segment writes property and casualty insurance outside of the standard market for hard-to-place risks, including catastrophe-exposed property, professional liability, products liability, general liability, commercial umbrella and other coverages modified for various exposures. In the Excess and Surplus Lines segment, the company wrote business through the following regional underwriting offices during 2009: Markel Northeast (Red Bank, New Jersey); Markel Southeast (Glen Allen, Virginia); Markel Midwest (Deerfield, Illinois); Markel Mid South (Plano, Texas); and Markel West (Woodland Hills, California and Scottsdale, Arizona).

Specialty Admitted segment writes risks that must remain with an admitted insurance

company for marketing and regulatory reasons. Underwriting units in this segment write specialty program insurance for various markets and personal and commercial property and liability coverages. In 2009, Specialty Admitted segment was comprised of two underwriting units, the Markel Specialty and Markel American Specialty Personal and Commercial Lines units.

London Insurance Market segment writes specialty property, casualty, professional liability, equine and marine insurance and reinsurance on a worldwide basis. The company participates in the London market through Markel International, which includes Markel Capital Limited and Markel International Insurance Company Limited (MIICL), wholly-owned subsidiaries. Markel Capital Limited is the corporate capital provider for Markel Syndicate 3000 at Lloyd's, which is managed by Markel Syndicate Management Limited, a wholly-owned subsidiary.

Markets

The E&S market focuses on hard-to-place risks and loss exposures that cannot be written in the standard market. E&S eligibility allows its insurance subsidiaries to underwrite loss exposures with policy forms and unregulated premium rates. The company also writes business in the Specialty Admitted market. It participates in the London market through Markel International, which includes Markel Capital Limited (Markel Capital) and Markel International Insurance Company Limited (MIICL). Markel Capital is the corporate capital provider for its syndicate at Lloyd's, Markel Syndicate 3000, which is managed by Markel Syndicate Management Limited.

History

Markel Corporation was founded in 1930.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
