pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Marsh & McLennan Companies, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Marsh & McLennan Companies, Inc. business.

About Marsh & McLennan Companies, Inc.

Marsh & McLennan Companies, Inc., a global professional services company, provides advice and solutions in the areas of risk, strategy, and human capital.

Segments

The company conducts business through three operating segments: Risk and Insurance Services; Consulting; and Risk Consulting and Technology.

RISK AND INSURANCE SERVICES

The Risk and Insurance Services segment includes risk management activities (risk advice, risk transfer and risk control and mitigation solutions), as well as insurance and reinsurance broking and services. The company conducts business in this segment primarily through Marsh, the insurance broker, intermediary, and risk advisor; and Guy Carpenter, the risk and reinsurance specialist.

Marsh

Marsh delivers risk and insurance services and solutions to its clients. Approximately 23,000 Marsh colleagues provide risk management, risk consulting, insurance broking, alternative risk financing, and insurance program management services to a range of businesses, government entities, and professional service organizations worldwide in approximately 100 countries.

Insurance Broking and Risk Consulting

In its main insurance broking and risk consulting business, Marsh employs a team approach to address clients' risk management and insurance needs. Each client relationship is coordinated by a client executive who draws from various industry and risk specialties within Marsh to assemble the resources needed to analyze, measure, and assist a client in managing its various risks. Product and service offerings include program design and placement, post-placement program support and administration, claims advocacy, and risk analysis, and risk management consulting services. These include Multinational Client Service, Marsh Risk Consulting, Risk, Specialty and Industry Practices, Bowring Marsh, Consumer Operations, and Marsh & McLennan Agency.

Multinational Client Service: Multinational Client Service (MCS) is focused on delivering service excellence and insurance solutions to multinational clients, irrespective of their size. MCS provides risk management programs with a service platform that comprises a combination of proprietary tools and technology and specialized resources. MCS provides global expertise and an intimate knowledge of local markets, helping clients navigate local regulatory and legal environments and address the worldwide risk issues that confront them.

Marsh Risk Consulting: Marsh Risk Consulting (MRC) is a global organization comprising consulting specialists providing clients with advice and solutions across a range of insurable and non-insurable risk issues, such as restructuring, product safety, patient safety, business interruption, supply chain, governance, workforce, and reputation. MRC helps clients identify exposures, assess critical business functions, and evaluate existing risk treatment practices and strategies. MRC provides client services in five main areas of exposure: business/enterprise risk: provides risk modeling and assessments, enterprise risk management, risk management optimization and reputational risk and crisis management; claims and litigation support: provides support and solutions to clients to assist in managing claim portfolios and resolving insured and uninsured losses and disputes of various kinds, as well as calculating losses and asset valuations; operational risk management: provides an integrated approach to managing

and optimizing the impact of operational risks, such as those associated with property (including natural hazards), supply chain, business continuity, and products (including recalls); human capital: assists in protecting the quality of clients' operational processes and the health and safety of their employees, focusing on issues, such as absenteeism, safety and ergonomic programs and employment practices; and risk technologies: provides services to help clients manage, collect, analyze, and report on the data and workflow associated with risk, insurance, claims and legal matters within their organizations.

Risk, Specialty and Industry Practices: Marsh provides consultative advice, brokerage, and claims advocacy

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
