Abstracts

Maxygen, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Maxygen, Inc. and its competitors. This provides our Clients with a clear understanding of Maxygen, Inc. position in the [Pharmaceuticals and Biotechnology](#) Industry.

The report contains detailed information about Maxygen, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Maxygen, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Maxygen, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Maxygen, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Maxygen, Inc. business.

About Maxygen, Inc.

Maxygen, Inc., a biopharmaceutical company, focuses on developing improved versions of protein drugs. The company uses its MolecularBreeding directed evolution technology platform, along with ancillary technologies, and protein modification expertise to pursue the creation of biosuperior proteins.

The company operates its research and development operations through Perseid Therapeutics LLC (Perseid), which engages in the discovery, research, and development of multiple protein pharmaceutical programs, including CTLA-4 Ig product candidates (designated as its MAXY-4 program) that are designed to be next-generation CTLA-4 Ig therapeutics for the treatment of an array of autoimmune disorders, including rheumatoid arthritis, and transplant rejection.

Product Candidates

MAXY-4

The company's primary product candidates in the MAXY-4 program are designed to be next-generation CTLA-4 Ig therapeutics for the treatment of an array of autoimmune disorders, including rheumatoid arthritis, and transplant rejection. These candidates are

designed to block the co-stimulation of T cells, a subset of white blood cells that are known to be involved in the pathogenesis of autoimmunity. Perseid has co-development and commercialization agreement with Astellas relating to the development and commercialization of its MAXY-4 product candidates for autoimmune diseases and transplant rejection. Under the terms of the agreement, Perseid would co-develop with Astellas MAXY-4 product candidates for autoimmune indications in North America and European countries. Astellas has been granted rights to develop MAXY-4 product candidates for autoimmune indications outside of North America and Europe, and for the prophylaxis or treatment of transplant rejection worldwide.

Other Products

In addition to the MAXY-4 program, the company also has various early-stage research and discovery programs primarily targeting the treatment or prevention of certain autoimmune disorders and transplant rejection.

MAXY-G34

The company's MAXY-G34 product candidate has been designed to be an improved next-generation pegylated, granulocyte colony stimulating factor (G-CSF) for the treatment of chemotherapy-induced neutropenia. G-CSF products, such as MAXY-G34 may also have potential application in the treatment of ARS, an acute illness caused by irradiation of the entire body by a high dose of penetrating radiation in a short period of time. In May 2009, the company entered into an option and license agreement with Cangene Corporation (Cangene) pursuant to which the company has granted Cangene options to obtain certain licenses to intellectual property rights associated with its MAXY-G34 program to fulfill potential future government contracts related to the development, manufacture and procurement of MAXY-G34 for the treatment or prevention of neutropenia associated with acute radiation syndrome (ARS).

Codexis, Inc.

As of December 31, 2009, the company owned approximately 21% of the issued and outstanding capital stock of Codexis. The company has granted to Codexis certain rights to its MolecularBreeding directed evolution platform for certain small molecule pharmaceutical, energy, and industrial chemical applications.

Dispositions

In January 2010, the company consummated a transaction with AltraVax, Inc., a newly formed, privately-held biopharmaceutical company, for the sale of its vaccine related assets, including the related government grants.

Competition

The company faces competition from large pharmaceutical and biopharmaceutical companies, such as Eli Lilly and Company, Pfizer, Inc., Genentech, Inc., Bristol-Myers Squibb Company, Schering-Plough Corporation, and Amgen Inc.; and from smaller biotechnology companies, such as Human Genome Sciences, Inc., Teva Pharmaceutical Industries Ltd., Zymogenetics, Inc., Inspiration Biopharmaceuticals, Inc., and Catalyst Biosciences, Inc. It also identifies competition from BioGeneriX AG, Verenum Corporation, Xencor, Inc., and Nautilus Biotech. The company also identifies competition from academic institutions, such as the California Institute of Technology, Pennsylvania State University, the University of California, and the University of Washington.

History

Maxygen, Inc. was founded in 1996.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
