company's decision-making processes.

In the part that describes McAfee, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of McAfee, Inc. business.

About McAfee, Inc.

McAfee, Inc. operates as a security technology company. The company delivers solutions and services that help secure systems and networks worldwide, allowing users to connect to the Internet, browse and shop the Web.

Business and Products

The company develops, markets, distributes, and supports computer security solutions for large enterprises, governments, small and medium-sized businesses and consumers either directly or through a network of distribution partners. The company operates its business in five geographic regions: North America; Europe, Middle East and Africa; Japan; Asia-Pacific, excluding Japan; and Latin America.

Geographic Theatres

The company divides its markets into five geographic theaters: North America; Europe, Middle East and Africa (EMEA); Asia-Pacific, excluding Japan (APAC); Japan; and Latin America.

Products

The company's security products address security in three key areas: endpoint security, network security and risk and compliance.

Endpoint Security Offerings

The company's endpoint security offerings secure corporate and consumer computer systems, including servers, desktop and laptop computers, handheld voice and data phones, and other devices that are connected to corporate systems and networks and home PCs. Within its endpoint security offerings are its system security products and its data protection products, each of which is managed under its own business unit. The company's system security products include anti-virus, anti-spyware and anti-spam, desktop firewall, host intrusion prevention, Web security, host network access control, Web filtering for endpoint, and device control.

The company's data protection products include its endpoint encryption products that use encryption to safeguard vital information residing on various devices, and its data loss prevention products that prevent malicious or unintentional data loss that occurs through unauthorized transmission or through theft or loss of devices that contain sensitive information.

The company's consumer security offerings, which the company operates as a separate business unit from its system security products, shield consumers from identity theft, phishing scams, spyware, malicious Web sites and other threats that endanger the online experience. The company's consumer products are distributed through partner, direct and retail channels, providing access wherever consumers choose to purchase.

The company's endpoint security offerings include its mobile security solutions that protect mobile operators and their users by safeguarding mobile terminals, applications and content. The company's mobile security offerings limit the spread of mobile malware, inappropriate content and unsolicited messaging.

Network Security Offerings

The company's network security offerings apply to corporate networks of all sizes and provide the same type of security measures that endpoint protection provides but are modified to protect network systems, servers, laptops and other network devices as well as users and data. Network security encompasses enterprise-class firewall, intrusion detection and prevention, network access control, network behavior analysis, network threat response, Web, email and data loss prevention security appliances and solutions.

Network security appliances provide network-class policy enforcement and threat detection and prevention across network boundaries, as well as visibility and control of user access and behavior. Network solutions also available as SaaS offerings include email security service and Web protection service.

The company's network security offerings include its McAfee SECURE standard, separate from the Payment Card Industry (PCI) Data Security Standard, designed to provide a level of security that an online merchant can reasonably achieve to help provide consumers with protection when interacting with Websites and shopping online.

Risk and Compliance Offerings

The company's risk and compliance offerings provide real-time insight into risk, vulnerabilities, and compliance profile. The company enables customers to direct security and resource investments where

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
