The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Meadowbrook Insurance Group Inc. business.

About Meadowbrook Insurance Group Inc.

Meadowbrook Insurance Group, Inc., through its subsidiaries, operates as a specialty insurance underwriter and insurance administration services company in the United States.

Subsidiaries

The company serves as a holding company for its wholly owned subsidiary Star Insurance Company (Star), and Star's wholly owned subsidiaries, Savers Property and Casualty Insurance Company (Savers), Williamsburg National Insurance Company (Williamsburg), and Ameritrust Insurance Corporation (Ameritrust), as well as, American Indemnity Insurance Company, Ltd. (American Indemnity). It also serves as a holding company for Meadowbrook, Inc. (Meadowbrook), Crest Financial Corporation, and their respective subsidiaries. In addition, it also serves as a holding company for ProCentury Corporation (ProCentury) and its wholly owned subsidiaries. ProCentury's wholly owned subsidiaries consist of Century Surety Company (Century) and its wholly owned subsidiary ProCentury Insurance Company (PIC). In addition, ProCentury Risk Partners Insurance Co. (Propic) is a wholly owned subsidiary of ProCentury.

Segments

The company conducts its operations through two segments, Specialty Insurance Operations and Agency Operations.

Specialty Insurance Operations

This segment provides underwriting and insurance administration services. It markets and underwrites specialty property and casualty insurance programs and products on both an admitted and non-admitted basis through a network of independent retail, wholesale program administrators, and general agents, who value service, specialized knowledge, and focused expertise. Its primary focus is on niche or specialty products and program business and risk management solutions for its customers. The services and coverages the company provides are tailored to meet specific requirements of defined client groups and their members, which may include specialty program underwriting; admitted and excess and surplus lines insurance products; alternative risk transfer solutions, and insurance administration services. The company provides various types of property and casualty insurance coverage, primarily to associations or similar groups of members and to the specified classes of business of its agents.

The company's insurance programs are diversified geographically, by class and line of business, type of insured and distribution. Within the workers' compensation line of business, it has a regional focus in California and New England. Within the commercial auto and commercial multiple peril line of business, the company has a regional focus in the Southeast and California. Within the general liability line of business it focuses on Texas.

Specialty Insurance Operations Programs and Products

The excess and surplus lines business the company writes is characterized by Main Street commercial risks that are ineligible for coverage by the standard market. The non-admitted programs it writes has characteristics that are similar to its admitted programs and the commercial risks it provides coverage for are ineligible for coverage by the standard or admitted market. With this focus on non-admitted program underwriting, the company provides coverage for start-up organizations and low volume programs that other markets are unable or unwilling to serve. The company also offers coverage for specialty markets, where specific and underwriting expertise is required. It develops solutions for specific market segments.

Fully-Insured Programs and Products:

With a fully-insured program, the company provides its insurance products.

Managed Programs

Services for which the company receives revenue from fee-for-service or managed programs include program design and development; underwriting; reinsurance placement; policy administration; loss prevention and control; claims administration and handling; litigation management; information technology and processing; accounting functions; and general operational functions and oversight of the program.

The company also provides insurance management services to public entity associations and provides services to public entity pools and other insurance entities, whi

The above Company Fundamental Report is a half-ready report and contents are subject to change.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
