The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of MedCath Corp. business.

About MedCath Corp.

MedCath Corporation engages in the ownership and operation of hospitals in partnership with physicians in the United States. The company also owns and/or manages cardiac diagnostic and therapeutic facilities. It primarily focuses on providing high acuity services, including the diagnosis and treatment of cardiovascular disease.

The company's 7 hospitals consist of 653 licensed beds. Its hospitals are located in six states Arizona, Arkansas, California, Louisiana, New Mexico, and Texas. In addition to its hospitals, the company owns and/or manages eight cardiac diagnostic and therapeutic facilities. Each of its majority-owned hospitals is a freestanding, licensed general acute care hospital that provides a range of health services with a majority focus on cardiovascular care. Each of its hospitals has a 24-hour emergency room staffed by emergency department physicians.

Diagnostic and Therapeutic Facilities

The company has participated in the development of or has acquired interests in, and provides management services to facilities where physicians diagnose and treat cardiovascular disease and manage hospital-based cardiac catheterization laboratories. It also owns and operates mobile cardiac catheterization laboratories serving hospital

networks and maintains various mobile and modular cardiac catheterization laboratories that it leases on a short-term basis. These diagnostic and therapeutic facilities and mobile cardiac catheterization laboratories are equipped to allow the physicians using them to employ a range of diagnostic and treatment options for patients suffering from cardiovascular disease.

Discontinued Operations

In November 2010, the company disposed of its interest in Southwest Arizona Heart and Vascular, LLC.

In October 2010, the company sold its Arizona Heart Hospital (Phoenix, Arizona).

In October 2010, the company disposed its wholly owned subsidiary that held 33.3% ownership of Avera Heart Hospital of South Dakota located in Sioux Falls, SD.

In November 2010, the company sold its Heart Hospital of Austin (Texas).

History

MedCath Corporation was founded in 1996.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
