Abstracts

MedClean Technologies, Inc Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between MedClean Technologies, Inc and its competitors. This provides our Clients with a clear understanding of MedClean Technologies, Inc position in the [Healthcare](#) Industry.

The report contains detailed information about MedClean Technologies, Inc that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for MedClean Technologies, Inc. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The MedClean Technologies, Inc financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes MedClean Technologies, Inc competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of MedClean Technologies, Inc business.

About MedClean Technologies, Inc

Medclean Technologies, Inc. provides solutions for managing medical waste on site, including designing, selling, installing, and servicing on site (in-situ) systems to treat regulated medical waste. The company provides these systems to hospitals and other medical facilities as solutions to incineration, off site hauling of untreated waste, and other alternative treatment technologies and methodologies.

Products

The company's principal products are the MedClean series systems. The MedClean system employs the following equipment and machinery: an autoclave vessel to sterilize the medical waste; a shredding device, the MedClean Shredder, to convert sterilized waste material into a non-recognizable confetti-like material qualifying the end product as safe municipal solid waste; an AutoTouch control station with software and hardware components that integrate and bundle operating and data recording functions into a system complying with regulatory requirements for conversion and disposal of medical waste, including real time centralized monitoring of the system's functions; a material transporter to mechanically transport the processed waste from shredder to the municipal solid waste compacting dumpster; and a QuietCart transport cart system to facilitate a single source containerization of the infectious waste from generation,

sterilization, processing, and return for refill without need for human interaction for ultimate operator safety.

The AutoTouch control system can communicate in multiple languages, including English and Spanish. The AutoTouch software permits real time centralized monitoring the functions and uses of each system by the company. Additionally, the centralized monitors track proper operation of a particular system. They also alert the company to the need to provide clients with supplies and preventative maintenance visits.

The MedClean Series System is offered in three configurations: container (modified 40/45/53' x9' metal shipping container), mobile (container as trailer), and fixed (traditional installation with in the facility). The mobile system can be operated as a tractor-pulled mobile unit servicing the needs of various hospitals with in a prescribed geographic area and also has the same utility umbilical cord feature. Both the container and mobile Systems can be configured with on-board steam and/or electrical generators to further installation and access to utilities.

The company also sells consumable items, including custom manufactured high temperature cart liners, deodorizers, and autoclave validation test kits. It also offers other components, such as printer paper, printer ribbon, autoclave gaskets, and replacement cart wheels.

Suppliers

The company's suppliers are SteelCraft Industries Limited; Weima America Corporation; Specialty Metal Products, Inc.; and MPF, Inc. Its suppliers also include Square D; Siemens Corporation; Magnatrol; and Cutler Hammer.

Competition

The company's competitors are Stericycle, Inc.; San-I-Pak; Tempico Inc.; Bondtech Corporation; and Red Bag Solutions, Inc.

History

The company was formerly known as Aduromed Industries, Inc. and changed its name to MedClean Technologies, Inc. in 2009.

The above Company Fundamental Report is a half-ready report and contents are

subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
