Abstracts

Medina International Holdings, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Medina International Holdings, Inc. and its competitors. This provides our Clients with a clear understanding of Medina International Holdings, Inc. position in the [Automobile Industry](#).

The report contains detailed information about Medina International Holdings, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Medina International Holdings, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Medina International Holdings, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Medina International Holdings, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Medina International Holdings, Inc. business.

About Medina International Holdings, Inc.

Medina International Holdings, Inc. manufactures commercial and recreational watercrafts under its wholly owned subsidiaries, Medina Marine and Harbor Guard Boats. The company's commercial products are utilized by fire, search & rescue, patrol, emergency, military and defense departments, while the recreational products are targeted towards leisure and sports inclined individuals.

Products

Commercial Boats - The company has eight commercial watercraft models, ranging from 12' to 37' in length.

12' Interceptor (Rescue Only) - With a patented V-hull, the 12' rescue boat is designed to keep quick-response in mind while serving to protect the waterways. With a jet engine, this watercraft can reach speed of up to 50 mph. In addition, its 12' rescue boat can pick-up speed from a standstill and can be stopped from high power movement. This light-weight vessel can accommodate up to 4 people at a time, including multiple containment area for patients.

15' Interceptor (Rescue and Fire Rescue) - With a patented V-hull, the 15' rescue boat is designed to keep quick-response in mind while serving to protect the waterways. With a jet engine, this watercraft can reach speed of up to 50 mph. This light-weight vessel can accommodate up to 6 people at a time, including multiple containment area for patients.

The 15' Fire Rescue model offers a patented water pump, draws water from underneath the boat and sprays at 750 GPM.

21' Rescue and Fire Rescue- The company is in the process of completing a prototype model of the 21' Fire Rescue model for testing. The company's 21' rescue model comes with five medical compartments, storage space for spine boards, and dive area in the front and back of the watercrafts. The company's 21' Fire Rescue model offers water pump draws water from underneath the boat and sprays at 750 GPM.

The Firehawk Defender is a quick response solution, designed and built to save lives in marine emergencies and security situations. These watercrafts have hulls with dual closed cell foam filled cavities and self bailing deck. Firehawk Model comes in 18', 24'/26', 28', 30'and 37' in length.

Firehawk Defender 18 - Dual 7' collapsible dive platform doors. These doors are manually controlled. The doors (foam filled) float on the waterline when completely lowered providing multiple patient access in a rescue situation. These doors also provide a flat waterline platform for dive exercises and rescue basket area for helicopter attachment and removal.

The Outboard Firehawk (Fire model) also provides a 1200 GPM fire pump and bow mounted monitor for fire suppression (water and foam) and 'pump out' capabilities. The below deck fire pump is directly plumbed through the keel (Patented). The pump is always primed and can supply water with a turn of a key for the fire pump engine.

The Twin Jet Drive Firehawk allows water to be diverted from one of the jet drives to provide 1200 GPM. The deck is also self bailing with the open transom and side dive door design allowing water to escape from the deck quickly.

Firehawk Defender 24'/26' - Dual 8' collapsible dive platform doors: These doors are hydraulically controlled from the drivers' helm with a manual override. The doors (foam filled) float on the waterline when completely lowered providing multiple patient access

in a rescue situation. These doors also provide a flat waterline platform for dive exercises and rescue basket area for easier helicopter attachment and removal.

The FIREHAWK (Fire model) also provides a 1200 GPM Hale fire pump and bow mounted Elkhart monitor for fire suppression (water and foam) and 'pump out' capabilities. The below deck fire pump is directly plumbed through the keel (Patented). The pump is always primed and can supply water with a turn of a key for the fire pump engine.

The Twin Jet Drive Firehawk can utilize one of the jet drives to divert water for fire suppression. This system also provides 1200 GPM. The deck is also self bailing with the open transom design and with the side dive doors allowing water to escape from the deck.

Firehawk Defender 28 - Dual 8' collapsible dive platform doors. These doors are hydraulically

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
