The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of The Men's Wearhouse, Inc. business.

About The Men's Wearhouse, Inc.

The Men's Wearhouse, Inc. is a specialty retailer of men's suits in the United States and Canada. As of January 30, 2010, the company operated 1,259 retail stores, with 1,142 stores in the United States and 117 stores in Canada.

The company's U.S. retail stores are operated under the brand names of Men's Wearhouse (581 stores), Men's Wearhouse and Tux (454 stores) and K&G (107 stores) in 47 states and the District of Columbia. Its Canadian stores are operated under the brand name of Moores Clothing for Men in 10 provinces.

The company also operates a corporate apparel and uniform program (operated as Twin Hill) and, in the Houston, Texas area, a retail dry cleaning and laundry business (operated as MW Cleaners).

Men's Wearhouse/Men's Wearhouse and Tux

Under the Men's Wearhouse brand, the company targets middle and upper-middle income men by providing merchandise, including a selection of designer, brand name, and private label merchandise. Its merchandise includes suits, suit separates, sport coats, slacks, formalwear, business casual, sportswear, outerwear, dress shirts, shoes

and accessories.

As of January 30, 2010, the company operated 581 Men's Wearhouse apparel stores in 47 states and the District of Columbia. These stores are referred to as 'Men's Wearhouse stores' or 'traditional stores' and are mainly located in middle and upper-middle income regional strip and specialty retail shopping centers.

As of January 30, 2010, the company also operated another 454 stores in 38 states branded as Men's Wearhouse and Tux that offer a selection of tuxedo rental product and a limited selection of retail merchandise, including formalwear and suit separates, dress shirts and ties targeted towards a younger customer. Of the 454 rental stores open as of January 30, 2010, 216 stores were located in proximity (one mile or less) to one of the company's traditional stores.

K&G

As of January 30, 2010, the company operated 107 K&G stores in 28 states. 94 of the K&G stores offer ladies' career apparel, sportswear and accessories. K&G's merchandising emphasizes various assortments across all major categories, including tailored clothing, casual sportswear, dress furnishings, children's clothing, footwear and accessories.

Moores

Moores is a specialty retailer of men's suits, with 117 retail apparel stores in 10 Canadian provinces, as of January 30, 2010. Similar to the Men's Wearhouse stores, Moores stores offer a selection of merchandise, including 'big and tall' products. Moores focuses on basic modified 'wear-to-work' apparel. Moores' merchandise consists of suits, sport coats, slacks, business casual, dress shirts, sportswear, outerwear, shoes and accessories. The company also offers tuxedo rentals at all of its Moores stores.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
