The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Merck KGaA business.

About Merck KGaA

Merck Group operates as a manufacturer of standard and specialty chemicals for the laboratory and industry. In Europe and the rest of the world the company is known as Merck and in North America the company operates under the name EMD. The Company offers more than 750,000 products, from more than 5,000 manufacturers, to over 250,000 customers throughout North America and Europe.

The Company's Liquid Crystals division: The Company's production facilities for the mica pigments are located at Iriodin, in Gernsheim (Germany), Savannah (United States), and Onahama (Japan). The Company's investments in facilities for the new, more high-tech pigments Colorstream and Xirallic for innovative effect pigments for the printing, paints, and cosmetic industry.

Optics and Cosmetics businesses of the Company: As a provider of vapor deposition chemicals, the company is substantially involved in technological innovations; innovative cosmetic effect pigments and a new encapsulation technology for substances that protect the skin.

As a provider of analytical reagents, the company's products can be found in chemical laboratories. The company's Life Science Products division supplies research-based companies in the pharmaceutical, biotechnology, and agrochemical sector (Life

Sciences) with a full range of products and services. In turn, the Company's U.S. subsidiary, which now operates under the name EMD Biosciences, developed a particularly large number of innovative products for biomedical research.

The Company's Laboratory Distribution Company, VWR International, enables its Analytics & Reagents and Life Science Products divisions to use cutting-edge sales channels in the two key regions, Europe and North America. Companies of the Merck Group are also developing in the emerging countries of Eastern Europe and Asia.

Business Sectors and Products

Pharmaceuticals

The Company's pharmaceuticals business comprises prescription drugs (Ethicals, e.g. for the treatment of metabolic and cardiovascular diseases), generics, and consumer health care products.

Products

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
