Abstracts

Met-Pro Corp. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Met-Pro Corp. and its competitors. This provides our Clients with a clear understanding of Met-Pro Corp. position in the <u>Heavy Machinery</u> Industry.

The report contains detailed information about Met-Pro Corp. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Met-Pro Corp.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Met-Pro Corp. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Met-Pro Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Met-Pro Corp. business.

About Met-Pro Corp.

Met-Pro Corporation engages in the manufacture and sale of product recovery and pollution control equipment for purification of air and liquids, fluid handling equipment for corrosive, abrasive and high temperature liquids, and filtration and purification products. The company markets and sells its products through its own personnel, distributors, representatives and agents. Its products are sold worldwide primarily in industrial markets.

Products, Services, and Markets

The company's segments include: Product Recovery/Pollution Control Technologies; Fluid Handling Technologies; Mefiag Filtration Technologies; and Filtration/Purification Technologies.

Product Recovery/Pollution Control Technologies

This segment provides solutions and manufactures products for the purification of air or liquids. This segment comprises the Met-Pro Environmental Air Solutions, Strobic Air Corporation, Met-Pro Product Recovery/Pollution Control Technologies Inc., and Met-Pro Industrial Services Inc. business units.

Met-Pro Environmental Air Solutions is a global provider of solutions and products for product recovery and pollution control applications. Product lines include Duall brand chemical and BIO-PRO biological odor control systems, fume and emergency gas scrubbers, HydroLance wet particulate collectors, carbon adsorption systems, mist eliminators, air strippers, and degasifiers for contaminated groundwater treatment, ducting, and exhaust fans; Flex-Kleen brand pulse jet fabric filters, product recovery, and dry particulate collectors and cyclones; and Met-Pro Systems brand custom engineered carbon adsorption systems for the concentration and recovery of volatile solvents, thermal and catalytic oxidation systems, regenerative thermal oxidizers, enclosed flares, and the supply of abatement catalysts.

Met-Pro Environmental Air Solutions' product lines are sold to various markets, including metal finishing and plating, wastewater treatment, composting, food processing, ethanol production, chemical, petrochemical, printed circuit, semiconductor, steel pickling, battery manufacturing, groundwater remediation, automotive, aerospace, furniture, painting, electronics, printing, and pharmaceutical industries. These product lines are sold worldwide by a combination of in-house personnel and manufacturer's representatives, as well as through the company's wholly owned Canadian subsidiary, Met-Pro Product Recovery/Pollution Control Technologies Inc.

Strobic Air Corporation engages in the air movement industry and designs and manufactures exhaust systems for laboratory fume hoods in university, public health, government, chemical, pharmaceutical, industrial, and other process industries. These product lines are sold worldwide by a combination of in-house personnel and manufacturer's representatives, as well as through the company's wholly-owned Canadian subsidiary, Met-Pro Product Recovery/Pollution Control Technologies Inc.

Met-Pro Product Recovery/Pollution Control Technologies Inc. markets, sells, and distributes in Canada the products of other business units in its Product Recovery/Pollution Control Technologies reporting segment.

Met-Pro Industrial Services Inc., located in Harleysville, Pennsylvania, provides aftermarket field services, including installation, preventative maintenance, trouble shooting, repair, upgrade, and performance testing on products related to the Product Recovery/Pollution Control Technologies reporting segment.

Fluid Handling Technologies

This segment manufactures horizontal, vertical, and in-tank centrifugal pumps that handle corrosive, abrasive, and high temperature liquids. This combination of pump types and configurations provides products that excel in applications requiring corrosion resistance, such as: the pumping of acids, brines, caustics, bleaches, seawater, waste liquids, and high temperature liquids used in many industrial and commercial applications. This segment comprises the Met-Pro Pump Group business unit (consisting of the Dean Pump, Fybroc and Sethco product brands). The Met-Pro Pump Group products are sold directly through regional sales managers and through a worldw

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Met-Pro Corp. Fundamental Company Report Including Financial, SWOT, Competitors and Industry Analysis

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources Financial

Physical

Technological

Organizational

Intangible resources Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
