Abstracts

Valmet Technologies Oy Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Valmet Technologies Oy and its competitors. This provides our Clients with a clear understanding of Valmet Technologies Oy position in the [Heavy Machinery](#) Industry.

The report contains detailed information about Valmet Technologies Oy that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Valmet Technologies Oy. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Valmet Technologies Oy financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Valmet Technologies Oy competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Valmet Technologies Oy business.

About Valmet Technologies Oy

Metso Corporation supplies technology and services for mining, construction, energy, metal recycling, and the pulp and paper industries.

The company's technology and services design, develop and produce systems, automation solutions, machinery and equipment for process industries. The main customer industries are mining and construction, energy, metal recycling as well as pulp and paper industries.

The company's businesses have operations in approximately 50 countries. The main market areas are Europe and North America. Its principal production plants are located in Finland, Sweden, France, Germany, Canada, the United States, China, India, South Africa and Brazil.

Segments

Metso Group comprises three segments: Mining and Construction Technology, Energy and Environmental Technology, and Paper and Fiber Technology.

Mining and Construction Technology

The company supplies process solutions, equipment and services for the mining and construction industries. Its product portfolio covers processing systems for aggregates, ores, industrial minerals and construction materials. The company's customers work in quarrying, aggregates production, construction, civil engineering, mining and minerals processing. The operations are organized in two business lines: Mining and Construction.

Energy and Environmental Technology

Energy and Environmental Technology supplies power generation, automation as well as metals recycling solutions and lifecycle services. The company's customers work in the power generation, oil and gas, metals recycling as well as pulp and paper industries. Energy and Environmental Technology comprises three business lines: Power, Automation and Recycling.

Paper and Fiber Technology

Paper and Fiber Technology is a supplier of processes, machinery, equipment and services for the pulp and paper industry. The offering extends over the entire process lifecycle, covering new lines, rebuilds and the services business. The segment is organized in three business lines: Paper, Fiber and Tissue.

Significant Events

On May 12, 2009, Fortum Oyj and Metso Corp. have partnered to explore oxyfuel combustion technology.

On February 18, 2010, Metso Corp., Stora Enso Corp. and Domtar Corporation have established a project to develop a pulp mill biorefinery based on new pulping technology.

Metso Corp. announced inauguration of Metso Park on March 10, in the city of Alwar in Rajasthan. The investment comprises multifunctional premises, including workshops, offices, engineering, logistics, and training centers. The products manufactured at Metso Park would be primarily delivered to the mining and construction industry customers in India and neighboring areas. Some of the products would also be transported to the other manufacturing units for adaptation for global markets. Metso Park would manufacture components for mobile crushing and screening plants,

vibrating screens and vibrators, slurry pumps and rubber products.

Acquisitions

The company, in October 2008, acquired G & F Beltline Services Pty Ltd, a provider of conveyer belt line installations and maintenance services based in Australia.

The company, in September 2008, acquired PSP Slévárna a.s. in Czech Republic. The company is a producer of finished manganese wear parts.

The company, in September 2008, also acquired from Finnish Fastpap Oy Ab its paper quality control business comprising the manufacturing and final assembly of measuring scanners used in Metso's Quality Control Systems as well as after sales services.

The company, in June 2008, acquired Mapag Valves GmbH, a German manufacturer of butterfly valves which was combined into the Energy and Environmental Technology segment.

The company, in May 2008, acquired Kemotron A/S, a Danish manufacturer of advanced measurement systems mainly to the pulp, paper and chemical industry.

Disposals of businesses

The company, in September 2008, divested the shares in Sweden-based Metso Foundries Karlstad AB to a group of financial investors represented by Primaca Group Oy. Metso will continue as a minority owner with a 16.7 percent holding in Heavycast Oy, a new company to which the Primaca Group transferred the acquired shares. The divested business was part of Paper and Fiber Technology segment.

The company, in May 2008, sold its spreader roll manufacturing business and related assets located in Nokia, Finland to a group of Finnish investors. They continued the business under the name of Finbow Oy. The divested business was part of Paper and Fiber Technology.

The company, in January 2008, concluded the divestment of its Panelboard business. The panelboard operations in Nastola, Finland and Sundsvall, Sweden were divested to the German company Dieffenbacher GmbH + Co. KG.

History

Metso Corporation was founded in 1942.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
