The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of MGN Technologies Inc. business.

About MGN Technologies Inc.

MGN Technologies, Inc., through its subsidiary, Ignition Technologies, engages in the development and licensing of mobile media entertainment applications for online wireless gaming activities, such as poker.

The company develops a gaming platform that creates simultaneous play between a web browser on a personal computer and a mobile phone device. Gaming platform is based on its mobile software platform that enables it to offer computer software games and services to mobile phone devices.

The company's proprietary software applications, such as mobile platforms and games developed to produce its own traffic. It also plans to sell targeted and measurable online advertising campaigns and programs for advertisers, generating customer leads, online sales, and increased brand recognition.

The company also plans to focus on its marketing competency and retooled business model would be based on advertising, lead generation and branding. It intends to serve search engine advertisements, banner ads, text messages, and a various other advertisements through the portals. Advertisers would bid on a pay-per-click price to place ads in the traffic through its portals.

Products

Media Platform: The Media Platform is a proprietary media software application for development, implementation, management and processing of online marketing campaigns. It allows publishers and advertisers to distribute online advertising.

Search Solutions: The company's Search Solutions are designed to connect advertisers with consumers who use search engines to search for information, products, and services. It intends to use its technology to help advertisers determine the keywords relevant to their products and services that would lead users from search engines to the advertisers' Web sites and to help advertisers optimize their search budgets.

Mobile Platform: The company developed a proprietary mobile media platform to host and distribute mobile Websites, applications, and media. The platform delivers content to approximately 500 different mobile devices on several different carriers.

The company's Gaming platform consists of software, databases, and computer servers that connect mobile phones, the Internet, player games, and provides the required hardware to operate the games, and information management functions.

Gaming through the MGN Mobile Gaming Platform: Three versions of game play are available on the Internet and mobile phones.

Play-For-Free (PFF): Members can play for free anytime. After registering for an account, points are provided to the player to learn and play the game. People play for free to learn how to play poker, to try out a new website or because they don't like to risk money.

Play-For-Prizes (PFP): Members play the games to earn points and can enter drawings for cash and prizes.

Play-For-Money (PFM): The company owns and licenses online gambling sites. Players compete against each other, and it or its operators are the house. It does not accept the United States bets. It focuses on International markets, such as Europe, and Asia. The company's initial game product is MGN Limit Texas Holdem', which consists all the basic aspects of an online Texas Holdem' game.

Mobile Gaming Platform

The company focuses to license its gaming platform to strategic partners in the gaming industry, including land-based casinos, poker operators, and corporations.

Agreements

Licensing Arrangements: In October 2006, the company entered into a license agreement with Robinson Wireless for the licensing of its mobile gaming platform that includes its Bronze, Silver, and Gold Texas Holdem products.

Other Agreements: In June 2005, the company and Illuminated Technologies Inc. entered into a consulting agreement, pursuant to which, Illuminated agreed to provide technology services and continued development of the mobile gaming technology.

Customers

As of December 2006, the company's major customer was Fortuna Gaming Corporation.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
