## **Abstracts**

Microsemi Corp. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Microsemi Corp. and its competitors. This provides our Clients with a clear understanding of Microsemi Corp. position in the [Semiconductor](#) Industry.

The report contains detailed information about Microsemi Corp. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Microsemi Corp.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Microsemi Corp. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Microsemi Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Microsemi Corp. business.

## **About Microsemi Corp.**

Microsemi Corporation engages in the design, manufacture, and marketing of analog and mixed-signal integrated circuits and semiconductors. The company's semiconductors manage and control or regulate power; protect against transient voltage spikes; and transmit, receive, and amplify signals.

### **Products**

The company's products include individual components, as well as integrated circuit solutions.

The company's integrated circuits (IC) products offer light, sound, and power management for desktop and mobile computing platforms, LCD TVs, and other power control applications. Power management refers to a class of standard linear integrated circuits (SLICs) that perform voltage regulation and reference in major electronic systems. The power management also encompasses other devices and modules, often application-specific standard products (ASSPs), which address particular aspects of power management, such as audio or display related ICs. This business consists of both a core platform of traditional SLICs, such as low dropout regulators (LDOs) and pulse width modulators (PWMs), and differentiated ASSPs, such as backlight inverters,

audio amplification ICs, and small computer standard interface terminators. Its IC products are used in notebook computers, data storage, wireless LAN, LCD backlighting, LCD TVs, LCD monitors, automobiles, telecommunications, test instruments, defense and aerospace equipment, sound reproduction, and data transfer equipment.

The company's individual component semiconductor products include silicon rectifiers, zener diodes, low leakage and high voltage diodes, temperature compensated zener diodes, transistors, subminiature high power transient suppressor diodes, and pin diodes used in magnetic resonance imaging (MRI) machines. It also manufactures semiconductors for commercial applications, such as automatic surge protectors, transient suppressor diodes used for telephone applications, and switching diodes used in computer systems. These products include implantable cardioverter defibrillator and heart pacer switching, charging and transient shock protector diodes, low leakage diodes, transistors used in jet aircraft engines, and test equipment, high temperature diodes used in oil drilling sensing elements operating at 200 degrees centigrade, temperature compensated zener or rectifier diodes used in missile systems and power transistors.

## Markets

The company's principal end markets include security and defense, aerospace, enterprise and commercial, and industrial and alternative energy.

**Defense and Security** – The company's products in this end market include mixed-signal analog integrated circuits, JAN, JANTX, JANTXV, and JANS semiconductors; and modules, including diodes, zeners, diode arrays, transient voltage suppressors, bipolar transistors, metal-oxide-semiconductor field-effect-transistors (MOSFETs), insulated gate bipolar transistors (IGBTs), small signal analog integrated circuits, small signal transistors, relays, silicon-controlled rectifiers (SCRs), and radio frequency (RF) transceivers and subsystems. These products are utilized in various applications, including radar and communications, defense electronics, homeland security, threat detection, targeting and fire control, and other power conversion and related systems in military platforms.

**Aerospace** –The company's products in this end market include offerings, such as JAN, JANTX, JANTXV, and JANS semiconductors; and modules and analog mixed-signal products, including diodes, zeners, diode arrays, transient voltage suppressors, bipolar transistors, small signal analog integrated circuits, relays, small signal transistors,

SCRs, MOSFETs, and IGBTs. These products are utilized in various applications, including electronic applications for large aircraft and regional jets, commercial radar and communications, satellites, cockpit electronics, and other power conversion and related systems in space and aerospace platforms.

Industrial and Alternative Energy – The company's products in this end market include MOSFETs, IGBTs, power modules, ultra thin bypass diodes, bridge rectifiers, and high-voltage assemblies for use in i

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

### RESEARCH METHODOLOGY

### DISCLAIMER

## 1. MICROSEMI CORP. COMPANY PROFILE

- 1.1. Key facts
- 1.2. Financial Performance
- 1.3. Key Executives
- 1.4. Ownership and Major Holders
- 1.5. Company History

## 2. MICROSEMI CORP. BUSINESS OVERVIEW

- 2.1. Business Description
- 2.2. Major Products and Services
- 2.3. Markets and Sales Activities
- 2.4. Locations, Subsidiaries, Operating Units

## 3. MICROSEMI CORP. SWOT ANALYSIS

- 3.1. Overview
- 3.2. Strengths
- 3.3. Weaknesses
- 3.4. Opportunities
- 3.5. Threats

## 4. MICROSEMI CORP. FINANCIAL ANALYSIS

- 4.1. Financial Statements
  - 4.1.1. Income Statement
  - 4.1.2. Balance Sheet
  - 4.1.3. Cash Flow
- 4.2. Financial Ratios
  - 4.2.1. Profitability
  - 4.2.2. Margin Analysis

- 4.2.3. Asset Turnover
- 4.2.4. Credit Ratios
- 4.2.5. Long-Term Solvency
- 4.2.6. Growth Over Prior Year
- 4.2.7. Financial Ratios Charts
- 4.3. Stock Market Snapshot

## **5. MICROSEMI CORP. COMPETITORS AND INDUSTRY ANALYSIS**

- 5.1. Microsemi Corp. Direct Competitors
- 5.2. Comparison of Microsemi Corp. and Direct Competitors Financial Ratios
- 5.3. Comparison of Microsemi Corp. and Direct Competitors Stock Charts
- 5.4. Microsemi Corp. Industry Analysis
  - 5.4.1. Semiconductor Industry Snapshot
  - 5.4.2. Microsemi Corp. Industry Position Analysis

## **6. MICROSEMI CORP. NEWS & EVENTS**

- 6.1. News & PR Activity Analysis
- 6.2. IR Corporate News
- 6.3. Marketing News
- 6.4. Corporate Events

## **7. MICROSEMI CORP. EXPERTS REVIEW<sup>1</sup>**

- 7.1. Experts Consensus
- 7.2. Experts Revisions

## **8. MICROSEMI CORP. ENHANCED SWOT ANALYSIS<sup>2</sup>**

## **9. UNITED STATES PESTEL ANALYSIS<sup>2</sup>**

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
