The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of MicroStrategy Inc. business.

About MicroStrategy Inc.

MicroStrategy Incorporated provides business intelligence software that enables companies to report, analyze and monitor the data stored across their enterprise to reveal the trends and insights needed to make business decisions. The company provides analytical performance to business users in the format that suits from high-level dashboards to custom reports and analysis via e-mail, Web, fax, wireless, and voice communication channels.

Products

The company offers an integrated business intelligence platform, known as MicroStrategy 9.

MicroStrategy 9: MicroStrategy 9 was introduced in January 2009.

MicroStrategy Intelligence Server: MicroStrategy Intelligence Server is the foundation for its business intelligence server. Its ad hoc query and reporting (ROLAP) technology enables organizations to conduct large-scale product affinity and product profitability analyses, research customer preferences through sales, contribution and pricing analysis, and compare present and historical customer retention data with forecasting

and trend metrics. MicroStrategy Intelligence Server generates optimized queries through its database drivers. MicroStrategy Intelligence Server contains an analytical engine with approximately 240 different mathematical, financial and statistical data mining functions with the flexibility for further function extensions.

MicroStrategy Report Services: MicroStrategy Report Services is the enterprise reporting engine of the MicroStrategy business intelligence platform that delivers a range of enterprise reports, including production and operational reports, managed metrics reports and scorecards. Its Dynamic Enterprise Dashboards combine data visualization and animation with its industrial-strength business intelligence platform to deliver information dashboards.

MicroStrategy OLAP Services: MicroStrategy 9 combines the speed and interactivity of multi-dimensional OLAP analysis with the analytical power and depth of relational OLAP. MicroStrategy OLAP Services is an extension of MicroStrategy Intelligence Server that allows MicroStrategy Web and Desktop users to manipulate Intelligent Cube databases. End users can add or remove report objects, add derived metrics and modify the filter, with 'speed-of-thought' response time against Intelligent Cubes. MicroStrategy OLAP Services enables multi-dimensional OLAP analysis with in Intelligent Cubes, while retaining the ability of users to drill through to the breadth and depth of the data warehouse.

MicroStrategy Web and MicroStrategy Web Universal: MicroStrategy Web is a proprietary zero-footprint, browser independent Web interface providing query, reporting and analysis through a platform independent architecture. MicroStrategy Web's interface features drag-and-drop report creation, one-click tool bars, dialogue boxes, spreadsheet formatting, advanced printing and exporting, and right-click menus for drilling, pivoting and sorting. MicroStrategy Web provides users with an interactive environment and low maintenance interface for reporting and analysis. Using this intuitive HTML-only Web solution, users access, analyze, and share corporate data.

MicroStrategy Distribution Services: MicroStrategy Distribution Services provides automated report and dashboard distribution via email, file servers, and networked printers. From small departments to enterprise-wide BI deployments, MicroStrategy Distribution Services deliver business performance reporting to tens or thousands of people.

MicroStrategy Office: MicroStrategy Office lets every Microsoft Office user run, edit and format any MicroStrategy report directly from within Microsoft applications, such as

Excel, PowerPoint and Word. MicroStrategy Office is designed using Microsoft .NET technology and accesses the MicroStrategy business intelligence platform using XML and Web services. MicroStrategy Office gives business users open and straightforward access to the functionality of the MicroStrategy platform—all from familiar Microsoft Office applications. MicroStrategy Office serves as a Microsoft add-in, with MicroStrategy functionality expressed as a single tool bar in Microsoft.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
