Abstracts

Mistras Group, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Mistras Group, Inc. and its competitors. This provides our Clients with a clear understanding of Mistras Group, Inc. position in the Commercial Services and Supplies Industry.

The report contains detailed information about Mistras Group, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Mistras Group, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Mistras Group, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Mistras Group, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Mistras Group, Inc. business.

About Mistras Group, Inc.

Mistras Group, Inc. and its subsidiaries provide proprietary, technology-enabled nondestructive testing (NDT) solutions used to evaluate the structural integrity of critical energy, industrial, and public infrastructure worldwide.

Services

The company provides a range of testing and inspection services to a customer base across energy-related, industrial and public infrastructure industries. The company either deploys its services directly at the customer's location or through its own network of field testing facilities. The company provides NDT inspection services through local offices. The company's portfolio of services include: testing components of new construction as they are built or assembled, providing corrosion monitoring data to help customers determine whether to repair or retire infrastructure, providing material analysis to ensure the integrity of infrastructure components and supplying non-invasive on-stream techniques that enable its customers to pinpoint potential problem areas prior to failure. In addition, the company also provides services to assist in the planning and scheduling of resources for repairs and maintenance activities.

Traditional NDT Services

The company's certified personnel provide a range of traditional inspection services. Its visual inspectors provide assessments of the condition of its customers' plant equipment during capital construction projects and maintenance shutdowns.

Mechanical Integrity Services: The company provides a range of mechanical integrity services that enable its customers to meet regulatory requirements.

Tank Inspection: The company provides a program for the inspection of above-ground storage tanks for the inspection, repair, alteration and reconstruction of oil and petrochemical storage tanks. This program includes magnetic flux exclusion for the rapid detection of floor plate corrosion, ultrasonic systems and leak detection of floor defects, remote ultrasonic crawlers for shell and roof inspections and trained, certified inspectors for visual inspection and documentation.

Advanced NDT Services

In addition to traditional NDT services, the company offers a range of advanced NDT services. The company also provides on-line monitoring capabilities or other solutions that enable the delivery of information to its customers. Some of the technologies they use include: automated ultrasonic testing; ground penetrating radar; guided ultrasonic long wave testing; dissolved gas analysis; on-line plant asset integrity; infrared thermography monitoring; phased array ultrasonic testing; risk-based inspection; acoustic emission testing; and digital radiography.

Other Products

AE Products

The company engages in the design and manufacture of AE sensors, instruments and systems used for the monitoring and testing of materials, pressure components, processes and structures. The company sells products as a system includes a combination of sensors, an amplifier, signal processing electronics, knowledge-based software and decision and feedback electronics, it can also sell these as individual components to certain customers that have the in-house expertise to perform their own services.

The company's sensors listen to structures and materials to detect AE activity and to determine the presence of structural flaws in the inspected materials. Such materials

include pressure vessels, storage tanks, heat exchangers, piping and reactors. In addition, the company provides leak monitoring and detection systems used in different applications, including the detection and location of both gaseous and liquid leaks in valves, vessels, pipelines and tanks.

AE Sensors: AE Sensors include approximately 200 different types of proprietary sensors.

Multi-channel AE Systems: Multi-sensor parallel processing systems capable of monitoring, detecting and locating defects in large structures, such as vessels, pipelines and platforms. These systems include the company's Sensor Highway II, which is designed for on-line remote monitoring of bridges and large transformers.

Hand-held Instruments: Portable AE systems adaptable to OEM applications.

Wireless AE Syst

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?
Rare?
Costly to imitate?
Organized properly?
