The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Modern Medical Modalities Corporation business.

About Modern Medical Modalities Corporation

Modern Medical Modalities Corporation provides cloud computing driven, healthcare administrative, and information services that are supported by its Web-based, enterprise-wide information system.

Services

The company's healthcare administrative and information services have the capacity to service multi-specialty healthcare markets. The healthcare administrative and information services include human resources, supply management, medical customer relationship management (CRM), electronic health records, patient billing and accounts receivables services, claims adjudication services, and business intelligence services. The company intends to focus on providing outsourced administrative and information services through its wholly-owned subsidiary, HealthIXS Corporation.

Human Resource Services

The company's human resource services support various types of personnel, including

employees and contractors. The personnel records functionality includes demographics, payroll, contacts, references, documents, position assignment, and continuing education. The employee benefits functionality helps manage insurance, accounts, such as 401Ks and FSAs, and time off benefits. The resource scheduling functionality helps manage schedules, time clocks, and attendance. The position control functionality defines the organization and helps manage interviews, hiring, and separation activities.

Supply Management Services

The company's supply management service provides inventory control, receiving and distribution functionality. The inventory control tracks medical supplies and equipment. The inventory control has features for reorder and warning levels of stock with one or multi-facility configurations, manages inventory across multiple locations and owners. The inventory functionality also supports scanning with bar-coding and SKU tracking. The supply management also supports purchasing, vendor management, and contract management. Purchase orders creation and flexible processing functionality is included, and integrates with accounts payable with various levels of approval processing for managers included. The purchasing functionality also includes requisitions functionality, which interacts with inventory for a flow of data throughout the supply chain.

Medical Customer Relationship Management (CRM) Services

The medical CRM services include marketing, contact management, pricing, and promotions-functionality. The marketing functionality is designed for any type of business workflow, including professional services, and wholesale, retail items, and is tuned for the services industries, such as health care. The marketing functionality also includes special processes that assist with determining costing and pricing scenarios, and includes promotions functionality that assists with the planning and execution of overall marketing and advertising campaigns and tracking return on investment. The medical CRM also includes sales functionality, such as proposals, customer orders, and sales tracking. The sales functionality is also tuned to support services companies, and includes quotes and proposals. The sales functionality also includes features for managing sales taxes, shipping activities, and on-line customer tracking through a customer portal. The sales functionality also supports customers that have multiple types of accounts, including pay-at order, monthly revolving, quarterly, and more. The medical CRM also includes customer services functionality that includes customer accounts management, consumer/patient portal, customer support, and service functionality.

Electronic Health Records

The electronic health records assists physicians and healthcare workers in collecting and managing electronic data for the patient's visits, status and history, including a past medical history, medications, allergies, and alerts and family history. All encounters record clinical documentation, including narratives, for all procedures, treatments and services, SOAP notes, exams, vital signs, and education and teaching. There's also an electronic prescription function, and printable, reader friendly reports.

Patient Billing and Acc

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
