Abstracts

Molycor Gold Corp. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Molycor Gold Corp. and its competitors. This provides our Clients with a clear understanding of Molycor Gold Corp. position in the Industry.

The report contains detailed information about Molycor Gold Corp. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Molycor Gold Corp.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Molycor Gold Corp. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Molycor Gold Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Molycor Gold Corp. business.

About Molycor Gold Corp.

Molycor Gold Corp. engages in the acquisition, exploration, and development of mining properties in British Columbia, Canada and Nevada.

Properties

Dobbin I property, British Columbia: The Dobbin I property consists of 52 claims. This Platinum, Palladium, and Copper prospect covers approximately 4,150 hectares (9,960 acres) in size. The property is located 27 kilometers Northeast of Kelowna, British Columbia and adjacent to the Dobbin II - Tadpole Lake Property, British Columbia. This project is a 50/50 joint venture with Goldrea Resources Corp.

Dobbin II property, British Columbia: The Dobbin II Tadpole Lake property is a Molybdenum prospect that hosts a quartz stockwork and molybdenum soils anomaly. The property is located 27 kilometers Northwest of Kelowna, British Columbia and adjacent to the Dobbin I property, in the Whiterocks Mountain region. This project is a 50/50 joint venture with Goldrea Resources Corp.

Windpass and Sweethome property, British Columbia: The Windpass and Sweethome properties are gold properties consisting of seven contiguous mineral leases totaling

389.34 hectares. The properties are located 50 kilometers northeast of Barriere, in the Thompson Plateau area of Central British Columbia. This project is 100% owned by the company.

Crowrea property, British Columbia: The Crowrea property is a Molybdenum prospect and is approximately 3,440 hectares (8,500 acres) in size. The property is located 15 miles south of Brenda Mines in the Osoyoos and Similkameen Mining Division near Summerland, B.C. This project is a 50/50 joint venture with Goldrea Resources Corp.

Flap property, British Columbia: The Flap property is a gold prospect and is approximately 3,440 hectares (8,500 acres) in size. The property is composed of 8 claims located in the Tadpole Lake area, Nicola Mining Division, 45 km. west of Kelowna, British Columbia. This project is a 50/50 joint venture with Goldrea Resources Corp.

Beaverdell property, British Columbia: The Beaverdell property is a silver, lead, and zinc prospect containing 27 mineral claims in the Greenwood Mining division. The claims are located 3 kilometers south-southeast of Beaverdell, BC. and 0.5 kilometers south of Teck-Cominco's past producing Beaverdell Mine. The company has an option agreement with Temoris Resources Inc. of Quebec whereby Temoris will acquire a 70% interest in the Beaverdell silver property.

Griffon property, Nevada: The Griffon property is a gold prospect consisting of 82 unpatented mining claims covering 1,640 acres. The property is located south of the White Pine Mining district in White Pine County, Nevada - 45 miles southeast of the town of Eureka, Nevada and 13 miles southeast of Mount Hamilton, an historic lead-zinc-silver mining area. This project is 100% owned by the company.

TKO & Hot Dog Ridge property, Nevada: The TKO - Hot Dog Ridge property is a gold prospect consisting of 34 unpatented claims of approximately 680 acres. The property is located in the Schell Creek Range of White Pine County, Nevada approximately 14 miles south east of Ely and 3 miles north of the Taylor Springs Mine. This project is 100% owned by the company.

Silverado property, Nevada: The Silverado property is a gold and silver prospect consisting of 169 unpatented and 3 patented mining claims of approximately 3,395 acres. The property is located in the Pinto Mining district, two miles east of the Eureka Mining district of central Nevada at the southern end of the Battle Mountain-Eureka gold trend. This project is 100% owned by the company.

Tami-Mosi property, Nevada: The Tami Mosi property is a gold prospect consisting of 119 unpatented mining claims of approximately 2,700 acres. The property is located in the Schell Creek Range of White Pine County, Nevada approximately 8 miles south east of Ely in the Tamberlaine district, 9.2 miles north of the Taylor silver mine. This project is 100% owned by the company.

Davis property, Nevada: The Davis Gold property is a gold and silver prospect consisting of 25 unpatented lode mining claims. The property is located on the Walker Lane Gold Trend, 5 miles east of past producing Paradise Peak Mine, Nye County, Nevada. This project is 100% owned by the company.

Ridgetop property, Nevada: The Ridgetop property is a gold prospect consisting of 58 unpatented claims of approximately 1,160 acres. The property is located in the Shell Creek Range of White Pine County, Nevada approximately 25 kilometers southeast of Ely, Nevada. This project is 100% owned by the company.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
