The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Monsanto Co. business.

### **About Monsanto Co.**

As of FY 2016, Monsanto's revenue declined from USD 15,001.0M to USD 13,502.0M. Company's gross profit declined by 14.47%. Operating income decreased by 24.83% (FY 2016 USD 3,019.0M against FY 2015 USD 4,016.0M). Monsanto's net income on the contrary rose up to USD 1,368.0M.

Monsanto Company provides agricultural products for farmers. The company's seeds, biotechnology trait products, and herbicides provide farmers with solutions that produce foods for consumers, and feed for animals.

### **Segments**

The company manages its business in two segments, Seeds and Genomics, and Agricultural Productivity.

#### **Seeds and Genomics Segment**

The company, through Seeds and Genomics segment, produces seed brands, including

DEKALB, Asgrow, Deltapine, Seminis, and De Ruiters, and it develops biotechnology traits that assist farmers in controlling insects and weeds. It also provides other seed companies with genetic material and biotechnology traits for their seed brands.

## Products

**Germplasm:** These products include row crop seeds, such as corn hybrids and foundation seed, soybean varieties and foundation seed, cotton varieties, hybrids, and foundation seed, and other row crop varieties and hybrids, such as canola; and vegetable seeds, such as open field and protected-culture seed for tomato, pepper, eggplant, melon, cucumber, pumpkin, squash, beans, broccoli, onions, and lettuce.

**Biotechnology Traits:** These products enable crops to protect themselves from borers and rootworm in corn and leaf- and boll-feeding worms in cotton, reducing the need for applications of insecticides; and enable crops, such as corn, soybeans, cotton, and canola to be tolerant of roundup and other glyphosate-based herbicides. The products brands include SmartStax, YieldGard, YieldGard VT Triple, VT Triple PRO, and VT Double PRO for corn; Bollgard and Bollgard II for cotton; and Roundup Ready and Roundup Ready 2 Yield (soybeans only) Genuity, global umbrella trait brand.

**Distribution:** The company sells its products under Monsanto brands and license technology and genetic material to others for sale under their own brands. Through distributors, independent retailers and dealers, agricultural cooperatives, plant raisers, and agents, it markets its DEKALB, Asgrow, and Deltapine branded germplasm to farmers in every agricultural region of the world. In the United States, it markets regional seed brands under its American Seeds, LLC and Channel Bio, LLC businesses to farmers directly, as well as through dealers, agricultural cooperatives, and agents.

## Agricultural Productivity Segment

The company, through Agricultural Productivity segment, manufactures Roundup brand herbicides and other herbicides and provides lawn-and-garden herbicide products for the residential market. Its products include glyphosate-based herbicides, selective herbicides, and lawn-and-garden herbicides. It markets its lawn-and-garden herbicide products through The Scotts Miracle-Gro Company.

## International Operations

The company's sales outside the United States located in Brazil, Argentina, Canada,

Mexico, and India.

## History

Monsanto Company was founded in 2000.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
