The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of M&T Bank Corp. business.

About M&T Bank Corp.

M&T Bank Corporation, through its subsidiaries, provides commercial and retail banking services to individuals, corporations and other businesses, and institutions. Its principal subsidiaries include M&T Bank, and M&T Bank, National Association.

Segments

The company conducts its operations through the following business segments: Business Banking; Commercial Banking; Commercial Real Estate; Discretionary Portfolio; Residential Mortgage Banking; and Retail Banking.

The Business Banking segment provides a range of services to small businesses and professionals through its branch network, business banking centers and other delivery channels, such as telephone banking, Internet banking and automated teller machines within markets served by the company. Services and products offered by this segment include various business loans and leases, including loans guaranteed by the small business administration, business credit cards, deposit products, and financial services such as cash management, payroll and direct deposit, merchant credit card, and letters of credit.

The Commercial Banking segment provides a range of credit products and banking services for middle-market and large commercial customers, mainly within the markets served by the company. Services provided by this segment include commercial lending and leasing, letters of credit, deposit products, and cash management services.

The Commercial Real Estate segment provides credit and deposit services to its customers. Real estate securing loans in this segment is generally located in the New York City metropolitan area, upstate New York, Pennsylvania, Maryland, the District of Columbia, Delaware, Virginia, West Virginia, and the northwestern portion of the United States. Commercial real estate loans may be secured by apartment/multifamily buildings; office, retail and industrial space; or other types of collateral. Activities of this segment also include the origination, sales, and servicing of commercial real estate loans through the Fannie Mae DUS program and other programs.

The Discretionary Portfolio segment includes investment and trading securities, residential mortgage loans and other assets; short-term and long-term borrowed funds; brokered certificates of deposit and interest rate swap agreements related thereto; and offshore branch deposits. This segment also provides foreign exchange services to customers.

The Residential Mortgage Banking segment originates and services residential mortgage loans and sells those loans in the secondary market to investors or to the Discretionary Portfolio segment. This segment also originated loans to developers of residential real estate properties, although that activity has been significantly curtailed. In addition to the geographic regions served by or contiguous with the company's branch network, the company maintains mortgage loan origination offices in various states throughout the western United States. The company also purchases the rights to service mortgage loans.

The Retail Banking segment offers various services to consumers through various delivery channels which include branch offices, automated teller machines, telephone banking, and Internet banking. It has branch offices in New York State, Pennsylvania, Maryland, Virginia, the District of Columbia, West Virginia, Delaware, and New Jersey. The Retail Banking segment also offers certain deposit products on a nationwide basis through the delivery channels of M&T Bank, N.A. Credit services offered by this segment include consumer installment loans, automobile loans (originated both directly and indirectly through dealers), and home equity loans and lines of credit. The segment also offers to its customers deposit products, including demand, savings and time accounts; investment products, including mutual funds and annuities; and other

services.

Subsidiaries

M&T Bank, as of December 31, 2009, had 793 banking offices located throughout New York State, Pennsylvania, Maryland, Delaware, New Jersey, Virginia, West Virginia and the District of Columbia, plus a branch in George Town, Cayman Islands. As a commercial bank, M&T Bank offers a ran

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
