Abstracts

Mueller Water Products, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Mueller Water Products, Inc. and its competitors. This provides our Clients with a clear understanding of Mueller Water Products, Inc. position in the [Heavy Machinery](#) Industry.

The report contains detailed information about Mueller Water Products, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Mueller Water Products, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Mueller Water Products, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Mueller Water Products, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Mueller Water Products, Inc. business.

About Mueller Water Products, Inc.

Mueller Water Products, Inc. engages in the manufacture and marketing of products and services that are used in the transmission and distribution of drinking water and in water treatment facilities in North America.

Segments

The company operates in three segments: Mueller Co., U.S. Pipe, and Anvil.

Mueller Co.

The Mueller Co. segment manufactures valves for water and gas systems, including iron gate, butterfly, tapping, check, plug, and ball valves, as well as dry-barrel and wet-barrel fire hydrants and a line of metering and pipe repair products, such as clamps and couplings used to repair leaks. The business also provides residential and commercial meter products.

Water and Gas Valves and Related Products: The company's valve products are used to control transmission of potable (drinkable) water, non-potable water or gas. Water valve products typically range in size from 3/4 inch to 36 inches in diameter. Its valves

are used in water distribution and water treatment facilities. The company also produces small valves, meter bars, and line stopper fittings for use in gas systems. In addition, it manufactures machines and tools for tapping, drilling, extracting, installing, and stopping-off, which are designed to work with its water and gas fittings and valves as an integrated system.

Fire Hydrants: Mueller Co. manufactures dry-barrel and wet-barrel fire hydrants. The company sells fire hydrants for new water infrastructure development, fire protection systems, and water infrastructure repair and replacement projects. Its fire hydrants consist of an upper barrel and nozzle section and a lower barrel and valve section that connects to a water main. The company sells dry-barrel fire hydrants with the Mueller and U.S. Pipe brand names in the United States and the Mueller and Canada Valve brand names in Canada. It also makes wet-barrel hydrants, where the valves are located in the hydrant nozzles and the barrel contains water at all times.

Other Products and Services: Mueller Co. manufactures a line of metering products for the water industry, marketed under the Mueller Systems and Hersey Meters names. The company also offers Automated Meter Reading and Advanced Meter Infrastructure metering solutions. Other products include pipe repair products, such as clamps and couplings used to repair leaks and municipal castings, such as manhole covers and street drain grates. The company sells these products under the Mueller and Jones brand names. It also provides installation, replacement, and maintenance services on new and existing valves, fire hydrants, and service lines under the Mueller Service brand name. Services include wet taps, dry installs, line stops, and main-to-meter connections with excavation and refurbishment.

U.S. Pipe

The U.S. Pipe segment manufactures a line of ductile iron pipe, restraint joint products, and other ductile iron products. U.S. Pipe products are sold primarily to waterworks distributors, contractors, municipalities, utilities, and other governmental agencies.

The company's ductile iron pipe typically ranges from 4 inches to 64 inches in diameter and approximately 20 feet in length. Ductile iron pipe is used primarily for potable water distribution systems, small water system grids, reinforcing distribution systems (including looping grids and supply lines), major water transmission mains, wastewater collection systems, sewer force mains, and water treatment plants. The company's Fast Fabricators business manufactures and sells a line of fabricated pipe, coated pipe and lined pipe products used primarily in wastewater treatment facilities.

Anvil

The Anvil segment manufactures and sources a range of products, including fittings, couplings, hangers, nipples, valves, and related pipe products for use in various forms of non-residential construction for heating, ventilation and air conditioning (HVAC), fire protection, industrial, energy, and oil and gas applications. Anvil sells primarily to distributors who then sell the products to end users.

Fittings and Couplings: Anvil manufactures threaded and grooved pipe fittings. Pipe fittings and couplings join two pieces

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
