Abstracts

Muscato Group Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Muscato Group Inc. and its competitors. This provides our Clients with a clear understanding of Muscato Group Inc. position in the Industry.

The report contains detailed information about Muscato Group Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Muscato Group Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Muscato Group Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Muscato Group Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Muscato Group Inc. business.

About Muscato Group Inc.

Muscato Group, Inc., a financial and healthcare services technology company, engages in the development, operation, and licensing of proprietary technology used to enable platform interoperability and in the initiation and settlement of electronic payments/transactions.

Products

Software Licensing

The company's portfolio of software products is focused on delivering real-time transaction processing capability to targeted vertical applications. It licenses software to clients in markets like finance, healthcare, and transportation. It owns, maintains, and develops two software products: ENGIN - interoperability middleware with healthcare vertical plug-in; and authENGIN - transaction authentication and settlement software.

ENGIN

ENGIN is an interoperability middleware software product that enables communications between disparate platforms without the engineering burden of various communications

architecture. ENGIN automates interaction between legacy systems and other hardware and software installations. It is an enterprise class product that is deployed in various corporations worldwide and in various market verticals, including healthcare (payor specific applications), financial (electronic benefits transfer, credit and debit card processing, prepaid cards, automated settlement), transportation, insurance, and telecommunications.

The company offers a 3-tiered messaging broker solution that addresses application and data integration challenges without disrupting existing assets. The solution provides transformation and exchange of real-time information, delivers performance advantages, and allows business decision makers to modify and configure rules with a graphical user interface (GUI). ENGIN performs message routing, translation and compounding at the back end – between OLTP systems and the applications that rely on them. The solution enables data exchange based on user-defined business rules for inbound and outbound messages.

authENGINE

authENGINE is a software product used to acquire, authenticate, route, switch, and authorize electronic transactions across multiple delivery channels. The company's target clients are international banks and payment processors that prefer to license software instead of investing to develop their own. Every time a consumer uses a credit or debit card, various systems are involved, including the merchant processor; Visa, MasterCard, or the ATM; and the card issuer systems. authENGINE essentially provides the 'electronic handshake' that connects these systems to complete the transaction.

In addition to processing various Visa, MasterCard, JCB, Discover, STAR and other network transactions, authENGINE provides credit and debit card issuing capability; PIN and signature based debit card processing; card management and authorization; card production and issuance; gateway services; loyalty programs; bill payment; and loan programs.

Competition

The company's competitors include ACIWorldwide; eFunds Corporation; S1 Corporation; OpenWay; Distra Pty Ltd.; CTL, Ltd.; Virtia; Trizetto; Microsoft; EDS; TIBCO; and Mercator.

History

Muscato Group, Inc. was founded in 2002.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
