pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Mvelaphanda Resources Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Mvelaphanda Resources Ltd. business.

About Mvelaphanda Resources Ltd.

Mvelaphanda Resources Ltd. (Mvela or the company) is an empowerment company with significant stakes in quality South African precious metal and mineral assets.

Diamonds

Mvela has a stake of 24.5% in Trans Hex Group Limited, South Africa's listed diamond producer. Trans Hex engaged in the exploration, mining and marketing of high quality alluvial diamonds from both land and sea operations. The company operates mines alongside the mid and lower Orange Rivers and off the South African and Namibian coasts and in Angola and produces some xxx carats per annum. Along with Trans Hex, Mvela Res has a 50/50 JV in Mvela Exploration, which targets diamond exploration projects throughout South Africa.

Mvela has a 33.3% interest in Ndownana, a JV with De Beers, which targets primary kimberlite exploration in defined areas of South Africa's Limpopo and Mpumalanga Provinces. Trans Hex produces conflict free diamonds and is a signatory to the Kimberley Process Certification scheme, which is aimed at eliminating trade in 'conflict' diamonds.

Platinum

Mvela's platinum interests are held through Northam Platinum Limited in which it has a 22.4% stake. Situated on the western limb of the Bushveld Complex, Northam, with its world class mining and smelting infrastructure, is one of the major employers in Limpopo province and is the platinum producer in the world, with an output of 330,000 PGM oz per annum and reserves and resources of 11.3 Moz and 20.3 Moz respectively. Northam's PGM customer base is spread across the major economic centres of the world.

In terms of PGM exploration Mvela has a 50% JV interest in the exploitation of PGMs on properties adjoining Southern Era's Messina platinum mine in the north-eastern Bushveld. Current estimations indicate a PGM resource of 7.8 Moz.

Gold

Mvela entered into an agreement with Gold Fields to acquire participation rights of up to 15% of the mining giant's precious metals exploration projects in Africa, giving Mvela and its shareholders access to local and international exploration opportunities and Gold Fields' proven geological expertise. The relationship with Gold Fields has been further strengthened in a groundbreaking empowerment transaction, whereby Mvela will acquire a 15% interest in Gold Fields' South African gold mines – Beatrix, Driefontein and Kloof.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
