Such information creates your awareness about principal trends of Mylan, Inc. business.

About Mylan, Inc.

Mylan, Inc. engages in the development, licensing, manufacture, marketing, and distribution of generic, brand and branded generic pharmaceutical products for resale by others, and active pharmaceutical ingredients (API) worldwide. The company, through Matrix Laboratories Limited (Matrix), manufactures and supplies API for its own products and pipeline, as well as for third parties.

The company's generic pharmaceutical business is conducted primarily in the U.S. and Canada (North America); Europe, the Middle East, and Africa (EMEA); and Australia, Japan and, New Zealand (the Asia Pacific). The company's API business is conducted principally through its majority-owned subsidiary, Matrix, which is included in the Asia Pacific. The company's specialty pharmaceutical business is conducted by Dey Pharma, L.P. (Dey).

Segments

The company operates through two segments, including Generics and Specialty.

GENERICS

North America

In North America, the company's Generics segment operates through two subsidiaries, Mylan Pharmaceuticals Inc. (MPI) and UDL Laboratories, Inc. (UDL). MPI is the company's primary U.S. pharmaceutical research, development, manufacturing, marketing, and distribution subsidiary. MPI primarily engages in the sale of solid oral dosage products. Additionally, MPI offers transdermal patch products that are developed and manufactured by Mylan Technologies, Inc. (MTI), the company's wholly owned transdermal technology subsidiary. UDL primarily re-packages and markets products either obtained from MPI or purchased from third parties, in unit dose formats, for use primarily in hospitals and other medical institutions.

In the U.S., the company has a product portfolio for generic pharmaceutical companies, consisting of approximately 224 products, of which approximately 206 are in capsule or tablet form in an aggregate of approximately 532 dosage strengths. Included in these totals are 25 extended release products in a total of 61 dosage strengths.

In addition to those products that the company manufactures in the U.S., the company also markets, principally through UDL, 50 generic products in a total of 102 dosage strengths under supply and distribution agreements with other pharmaceutical companies. The company's U.S. product portfolio also includes three transdermal patch products in a total of 15 dosage strengths that are developed and manufactured by MTI.

Through Mylan Pharmaceuticals ULC, the company's wholly owned subsidiary, the company manufactures and markets generic pharmaceuticals in Canada. Mylan Pharmaceuticals ULC offers a portfolio of approximately 120 products, in an aggregate of approximately 260 dosage strengths.

EMEA

The company's generic pharmaceutical sales in EMEA are generated primarily by its wholly-owned subsidiaries in Europe. The company has operations in 25 countries. In France, the company markets through its subsidiaries, Mylan S.A.S. and Qualimed S.A.S., a portfolio of approximately 160 products, in an aggregate of approximately 310 dosage strengths. In Italy, the company markets through its subsidiary, Mylan S.p.A., a portfolio of approximately 110 products, in an aggregate of approximately 210 dosage strengths. In Spain, the company markets through its subsidiary, Mylan Pharmaceuticals S.L., a portfolio of approximately 80 products, in an aggregate of approximately 190 dosage strengths. In Germany, the company markets through its subsidiary, Mylan dura, a portfolio of approximately 160 products, in an aggregate of

approximately 830 dosage strengths. In the U.K., the company offers a product portfolio of approximately 170 products, in an aggregate of approximately 380 dosage strengths. The company also operates in various markets in Central and eastern Europe, including Poland, Hungary, Slovakia, Slovenia, and the Czech Republic. Additionally, the company has an export business, which focuses on Africa and the Middle East.

Asia Pacific

The company markets generic pharmaceuticals in the Asia Pacific through wholly owned subsidiaries in Australia, New Zealand, India, and Japan. Additionally, the company markets API to third parties, as well as to other M

The above Company Fundamental Report is a half-ready report and contents are subject to change.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
