## Abstracts

Myrexis, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Myrexis, Inc. and its competitors. This provides our Clients with a clear understanding of Myrexis, Inc. position in the [Pharmaceuticals and Biotechnology](#) Industry.

The report contains detailed information about Myrexis, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Myrexis, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Myrexis, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your

company's decision-making processes.

In the part that describes Myrexix, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Myrexix, Inc. business.

### **About Myrexix, Inc.**

Myrexix, Inc., a biotechnology company, engages in the discovery, development, and commercialization of treatments for cancer. The company's development pipeline includes clinical and pre-clinical product candidates.

#### Clinical-Stage Oncology Programs

The company has two clinical-stage programs in oncology.

**Azixa:** Azixa is its advanced cancer drug candidate and is being developed for the treatment of advanced primary and metastatic tumors with brain involvement. Azixa acts as a microtubule destabilizing agent, causing arrest of cell division and programmed cell death, or apoptosis, in cancer cells. Azixa is in two Phase 2 clinical trials to determine its efficacy in Glioblastoma multiforme (GBM). It intends to initiate a two arm Phase 2b trial of Azixa in combination with the standard of care therapy, including radiation treatment and temozolomide compared to the standard of care therapy alone in patients newly diagnosed with GBM.

**MPC-3100:** MPC-3100 is an Hsp90 inhibitor the company is developing for the treatment of cancer. In 2009, the company initiated a Phase 1 open-label, dose-finding, multiple-dose clinical trial in patients with refractory or relapsed cancers, including solid

tumors, lymphomas, and leukemias.

## Preclinical Programs

The company's proprietary research is primarily focused on oncology. Its advanced preclinical drug candidates are:

**MPC-9528:** MPC-9528 is an orally-bio-available, potent, and selective small molecule cancer metabolism inhibitor (CMI) being developed by the company for the treatment of cancer. MPC-9528 inhibits Nicotinamide phosphoribosyltransferase (Nampt) in vitro and in cells at picomolar drug concentrations and is tumoricidal in every cancer line tested to date representing 15 different tumor tissue types. MPC-9528 displays on-target activity in tumor cells by potently reducing nicotinamide adenine dinucleotide (NAD) levels, which leads to inhibition of glycolysis, energy deprivation and cell death, while NAD in normal tissues is less affected. In in vitro preclinical efficacy studies, MPC-9528 causes tumor regressions in multiple tumor types when administered orally with either a low daily dose or higher intermittent dose schedule.

**MPI-485520:** MPI-485520 is an oral anti-interferon. MPI-485520 potently and selectively inhibits IKKe/TBK1 and is being developed by the company for cancer and diseases that result from chronic inflammation. MPI-485520 exhibits high oral bio-availability, ADME/PK properties, and efficacy in an in vivo mouse model. In cellular models of type I interferon production, MPI-485520 potently inhibits induction of type I interferons (IFN $\alpha$ /b) following stimulation of various receptors, such as TLR3, TLR4, RIG-I, and MDA-5. The company's efforts are focused on the development of IKKe/TBK1 inhibitors for rheumatoid arthritis and systemic lupus erythematosus (SLE).

**MPI-443803:** MPI-443803 is an orally available, brain penetrant, microtubule destabilizing agent the company is evaluating for the treatment of cancer. MPI-443803 is a potent inducer of apoptosis that prevents the polymerization of tubulin into microtubules.

**MPI-487109:** MPI-487109 is a potent fully-synthetic, orally-bio-available, small molecule inhibitor of Hsp90. MPI-487109 is being evaluated by the company as a follow-on drug candidate to MPC-3100.

## History

The company was formerly known as Myriad Pharmaceuticals, Inc. and changed its

name to Myrexix, Inc. in July 2010.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
