The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Nanika Resources Inc. business.

About Nanika Resources Inc.

Nanika Resources Inc. engages in the acquisition, exploration, development, and production of mineral properties located in Canada. The company primarily focuses on gold, copper, molybdenum, and other properties in British Columbia.

Properties

Lucky Ship (Molybdenum) Project, British Columbia: The Lucky Ship Project (Project), located in the Omineca Mining Division of British Columbia. The company has entered into a joint venture agreement with Palm Clean Energy Inc. (Palm Clean) and Daewon Chemical Co., Ltd. (Daewon) whereby Canada Molybdenum Corp. (CMC) was formed to carry out the joint venture operation for the further exploration and development of the Lucky Ship project. Based upon the terms of the joint venture agreement, the company owns a 60% interest and Palm Clean and Daewon own a 19% and 21% interest in CMC respectively.

Indi Project, British Columbia: The Indi property is a gold-silver-base metals Joint Venture property located approximately 24 kilometers north of Stewart, British Columbia. The company owns approximately a 45% interest in the joint venture property. It has completed a drilling program consisting of 7 diamond drill holes totaling

1038 meters of drilling.

Sweeney Lake Project, British Columbia: The Sweeney Lake copper prospect is located approximately 120 kilometers by logging roads south of the town of Houston, British Columbia. It is approximately 3 kilometers north of the operating Huckleberry mine.

Ted Claims, British Columbia: The company owns 100% interest in the Ted claims located in the Omineca Mining Division of British Columbia.

Mike Claims, British Columbia: The company has an option to acquire a 100% interest in 5 mineral claims, 1,800 hectares in size, approximately 10 kilometers by road southeast of Houston, British Columbia.

Tidewater Project, British Columbia: The company has an option to acquire a 100% interest in the Tidewater mineral claims located on Alice Arm in the Skeena Mining Division.

Indi South Claims, British Columbia: The company has entered into a purchase agreement to acquire a 100% interest in certain mineral claims located in the Skeena Mining Division of British Columbia.

Red Cliff East Claims, British Columbia: The company has entered into a purchase agreement to acquire a 100% interest in certain mineral claims located approximately 20 kilometers northeast of Stewart in north-west British Columbia.

Rivett Lake Property, Northwest Territories: The company has staked 27 claims, containing approximately 59,646 acres, at Rivett Lake.

Herb Lake Property, Manitoba: The company has entered into a purchase agreement to purchase 11 mineral claims comprising approximately 5,930 acres at Herb Lake to the immediate north of the Copperman Property of VMS Ventures Inc. located approximately 120 kilometers east of Flin Flon, Manitoba.

History

The company was incorporated in 1987. It was formerly known as New Cantech Ventures Inc. and changed its name to Nanika Resources Inc. in 2008.

The above Company Fundamental Report is a half-ready report and contents are

subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?
Rare?
Costly to imitate?
Organized properly?
