Abstracts

NanoViricides, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between NanoViricides, Inc. and its competitors. This provides our Clients with a clear understanding of NanoViricides, Inc. position in the [Pharmaceuticals and Biotechnology](#) Industry.

The report contains detailed information about NanoViricides, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for NanoViricides, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The NanoViricides, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes NanoViricides, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of NanoViricides, Inc. business.

About NanoViricides, Inc.

NanoViricides, Inc., a development stage nano-biopharmaceutical (nanomedicine) company, engages in the application of nanomedicine technologies to the complex issues of viral diseases.

The company has a single drug candidate, which is tackling various forms of influenza A viruses, including the H1N1/2009/CA swine flu virus, the H5N1 bird flu viruses, and various others.

Products

The company has development products against HIV; Epidemic Influenzas, including the H1N1/2009 swine flu virus, H5N1, and other highly pathogenic avian influenzas (H5N, H7N, H9N HPAI, Bird Flu), common seasonal human influenzas, rabies, and dengue; eye drops against viral diseases of the eye, such as conjunctivitis and keratitis; Herpes virus cold sores and genital herpes; and dengue viruses.

In addition, the company has research programs against rabies virus, ebola/marburg family of viruses, as well as other viral hemorrhagic fevers. It also has a research program called ADIF (accurate-drug-in-field). Adenoviral epidemic kerato-conjunctivitis

(EKC) is a pink eye disease that may lead to blurry vision in certain patients after recovery. Herpes simplex viral infections cause keratitis of the eye, and severe cases of infection may sometimes necessitate corneal transplants. It would negotiate with TheraCour to obtain licenses for additional viral diseases.

The company's product development programs would be divided into three sectors: commercially important diseases, neglected tropical diseases (NTD's) and biosecurity/biodefense; and advanced technologies.

Collaborations

The company employs collaborations with academic labs, government labs, as well as service contracts with external service providers. Its relationships include for influenza viruses, such as KARD Scientific, Inc., MA.; Southern Research Institute, AL.; TheVac, LLC, LA.; and National (Central) Institute of Hygiene and Epidemiology (NIHE) (Vietnam), for H5N1 avian flu. For HIV, such as KARD Scientific, Inc., MA.; Southern Research Institute, Frederick, MD.; and University of California at San Francisco (Dr. Cheryl Stoddart, PI), CA. For viral diseases of the eye (Adenoviruses, Herpesviruses - Epidemic Kerato-conjunctivitis (EKC), Herpes Keratitis), such as The Long Island Jewish Medical System, Feinstein Institute of Medical Research (LIJMS), New York; and TheVac, LLC. For herpes virus infections, the company has relationships with TheVac, LLC; and Northeastern Ohio Universities Colleges of Medicine and Pharmacy (NEOUCOM), Prof. Ken Rosenthal Lab. For dengue viruses, it has relationship with University of California at Berkeley, Prof. Eva Harris Lab. For Ebola/Marburg Viruses hemorrhagic fever viruses, such as United States Army Medical Institute of Infectious Diseases (USAMRIID), Dr. Gene Olinger Lab. For Rabies Virus, such as Center for Disease Control and Prevention (CDC), Dr. Robert Putnak Lab.; and National (Central) Institute of Hygiene and Epidemiology (NIHE), Vietnam.

License Agreement

In February 2010, the company approved an additional license agreement with TheraCour Pharma, Inc. (TheraCour). Pursuant to the exclusive additional license agreement, the company was granted exclusive licenses for technologies, developed by TheraCour, for the development of drug candidates for the treatment of dengue viruses, ebola/marburg viruses, japanese encephalitis, viruses causing viral conjunctivitis (a disease of the eye) and ocular herpes.

History

NanoViricides, Inc. was founded in 2005.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
