Such information creates your awareness about principal trends of Napco Security Technologies, Inc. business.

About Napco Security Technologies, Inc.

First Bancshares, Inc. operates as the holding company for First Home Savings Bank, which provides a range of community banking services in Missouri.

The company conducts its business from its home office in Mountain Grove and 10 full service branch facilities in Marshfield, Ava, Gainesville, Sparta, Theodosia, Crane, Galena, Kisse Mills, Rockaway Beach, and Springfield, Missouri.

The company primarily engages in the business of attracting deposits from the general public and using such deposits, together with other funding sources, to invest in loans, for its loan portfolio. Its deposit taking and lending activities primarily encompass Wright, Webster, Douglas, Christian, Ozark, Stone, Taney, and Greene counties in Missouri.

Lending Activities

The company primarily involves in the origination of conventional mortgage loans for the purpose of purchasing, constructing, or refinancing one-to-four family owner occupied homes within its primary market area. It also originates commercial real estate loans; land loans; consumer loans, such as mobile home loans, automobile loans, and loans

secured by savings accounts; and commercial business loans. In addition to loans within its primary market area, the company also originates loans in Arkansas, Oregon, Kansas, and other states.

One-to-Four Family Residential Loans: The company originates residential mortgage loans to enable borrowers to purchase existing homes, to construct new one-to-four family homes or refinance existing debt on their homes.

Second Mortgage Loans: The company originates fixed and adjustable rate second mortgage loans that are generally made on the security of the borrower's residence. It also offers home equity lines of credit.

Land and Commercial Real Estate Loans: The company has loans secured by land and commercial real estate. Its portfolio of commercial real estate loans includes loans primarily on farm land used in beef or dairy operations.

Consumer Loans: The company's consumer loans consist of automobile loans, recreational vehicles, mobile home loans, savings account loans, and various other consumer loans.

Commercial Business Loans: The company's commercial business loans consist of loans to businesses with no real estate as security, such as business equipment loans, farm equipment loans, and cattle loans.

Investment Portfolio

As of June 30, 2010, the company's investment portfolio included debt securities, such as United States government and federal agencies obligations, obligations of state and political subdivisions, and federal agency mortgage- backed securities; and equity securities, including FHLB stock.

Deposit Activities

The company offers a selection of deposit instruments, including negotiable order of withdrawal (NOW) accounts, money market accounts, regular savings accounts, certificates of deposit, and retirement savings plans.

Subsidiary Activities

The company's wholly owned subsidiary, Fybar Service Corporation, which serves as trustee on its deeds of trust, is a registered agent and writes credit life and accident and health policies in conjunction with the company's loans.

History

First Bancshares, Inc. was founded in 1911.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
