The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of National Interstate Corporation business.

## **About National Interstate Corporation**

National Interstate Corporation, through its subsidiaries, operates as a specialty property and casualty insurance company in the United States, the District of Columbia, and the Cayman Islands. The company underwrites and sells traditional and alternative property and casualty insurance products primarily to the passenger transportation industry and the trucking industry, general commercial insurance to small businesses in Hawaii and Alaska and personal insurance to owners of recreational vehicles and commercial vehicles throughout the United States. The company is a subsidiary of Great American Insurance Company.

The company has four property and casualty insurance subsidiaries, including National Interstate Insurance Company (NIIC), National Interstate Insurance Company of Hawaii, Inc. (NIIC-HI), Triumpher Casualty Company (TCC), Hudson Indemnity, Ltd. (HIL) and six other agency and service subsidiaries. The company writes its insurance policies on a direct basis through NIIC, NIIC-HI and TCC. NIIC is licensed in 50 states and the District of Columbia. NIIC-HI is licensed in Ohio, Hawaii, Michigan, and New Jersey. TCC, a Pennsylvania domiciled company, holds licenses for multiple lines of authority, including auto-related lines, in 24 states and the District of Columbia. HIL provides reinsurance for NIIC, NIIC-HI and TCC primarily for the alternative risk transfer product.

Insurance products are marketed through multiple distribution channels, including independent agents and brokers, affiliated agencies and agent Internet initiatives. The company uses its six agency and service subsidiaries to sell and service its insurance business.

## Property and Casualty Insurance Operations

The company is a specialty property and casualty insurance company. The products that the company writes for the insurance market includes captive programs primarily for transportation companies, traditional property and casualty insurance for transportation companies, specialty personal lines, consisting primarily of recreational vehicle coverage and transportation and general commercial insurance in Hawaii and Alaska.

## Products

The company offers approximately 35 product lines in the specialty property and casualty insurance market, which it groups into 4 general business components, such as transportation, alternative risk transfer, specialty personal lines and Hawaii and Alaska.

**Alternative Risk Transfer:** The company underwrites, markets, and distributes primarily truck and passenger transportation alternative risk insurance products, also known as captives, as well as workers' compensation coverage. The company supports two forms of captive programs — member-owned and rented. In a member-owned captive, the participants form, capitalize and manage their own reinsurance company. In a rental captive, the reinsurance company is formed, capitalized and managed by someone other than the participants.

**Transportation:** The company writes insurance for the passenger transportation industry in the United States. In its transportation component, the company underwrites commercial auto liability, general liability, physical damage and motor truck cargo coverages for truck and passenger operators. Passenger transportation operators include charter and tour bus companies, municipal transit systems, school transportation contractors, limousine companies, inter-city bus services and community service and paratransit operations.

**Specialty Personal Lines:** The company offers coverages written specifically for recreational vehicle (RV) owners, including those who live in their RV full-time. The

company offers coverage for campsite liability, vehicle replacement coverage and coverage for trailers, golf carts and campsite storage facilities. In addition to its RV product, the company also offers companion personal auto coverage to RV policyholders. This product covers the automobiles owned by its insured RV policyholders.

Hawaii and Alaska: The major insurance product managed by the Hawaii office was general commercial insurance sold to Hawaiian small business owners.

## Competition

In the specialty insurance market, the company competes against, among others, Lancer Insurance Company, RLI Corporation, American Alternative Insurance Corporation, Progressive Corporation, Island Insurance Company, Great West Casualty Company, Northland Insurance Company, Century Insurance Group, and American Modern Home Insurance Company.

## History

National Interstate Corporation was founded in 1989.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

### **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

### **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
