The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Natural Resource Partners LP business.

### **About Natural Resource Partners LP**

Natural Resource Partners L.P., through its subsidiaries, engages in the ownership and management of coal properties in the three coal-producing regions of the United States: Appalachia, the Illinois Basin, and the western United States. NRP (GP) LP serves as the general partner of the company.

The company leases its properties to coal mine operators in exchange for royalty payments. As of December 31, 2009, the company owned or controlled approximately 2.1 billion tons of proven and probable coal reserves. Its coal reserves were subject to 210 leases with 72 lessees.

The company owns preparation plants and related coal handling facilities. In addition to preparation plants, it owns coal handling and transportation infrastructure in West Virginia, Ohio and Illinois.

The company owns and manages aggregate reserves. It owns an estimated 130 million tons of aggregate reserves that are principally located in Washington, Texas, and Arizona. It also owns aggregate reserves in West Virginia. The company owns a total of 56 million tons of reserves at its Washington property.

## Properties

### Northern Appalachia

**Beaver Creek:** The Beaver Creek property is located in Grant and Tucker Counties, West Virginia. The company leases this property to Mettiki Coal, LLC, a subsidiary of Alliance Resource Partners L.P. Coal is shipped to the Mount Storm power plant of Dominion Power.

**Gatling WV:** The Gatling property is located in Mason County, West Virginia. In 2009, 406,000 tons were produced from the property. Clean coal is transported via beltline either directly to American Electric Power or to a barge loading facility.

**AFG-Southwest PA:** The AFG property is located in Washington County, Pennsylvania. The company leases this property to Conrhein Coal Company, a subsidiary of Consol Energy. Coal is shipped to utility customers, such as American Electric Power and Allegheny Energy.

**Gatling OH:** The Gatling property is located in Meigs County, Ohio. Clean coal is transported to American Electric Power.

### Central Appalachia

**VICC/Alpha:** The VICC/Alpha property is located in Wise, Dickenson, Russell, and Buchanan Counties, Virginia. The company primarily leases this property to Alpha Land and Reserves, LLC, a subsidiary of Alpha Natural Resources, Inc. Coal is shipped to utility and metallurgical customers. Major customers include American Electric Power, Southern Company, Tennessee Valley Authority, VEPCO and U.S. Steel and to various export metallurgical customers.

**Lynch:** The Lynch property is located in Harlan and Letcher Counties, Kentucky. The company primarily leases the property to Resource Development, LLC, an independent coal producer. Coal is shipped to utility customers, such as Georgia Power and Orlando Utilities.

**D.D. Shepard:** The D.D. Shepard property is located in Boone County, West Virginia. This property is primarily leased to a subsidiary of Patriot Coal Corp. Coal is shipped to customers, such as American Electric Power and to various export metallurgical customers.

**Dingess-Rum:** The Dingess-Rum property is located in Logan, Clay and Nicholas Counties, West Virginia. This property is leased to subsidiaries of Massey Energy and Patriot Coal. Coal is shipped to steam customers, such as American Electric Power, Dayton Power and Light, Detroit Edison, and to various export metallurgical customers.

**VICC/Kentucky Land:** The VICC/Kentucky Land property is located primarily in Perry, Leslie and Pike Counties, Kentucky. Coal is shipped primarily to customers, such as Southern Company, Tennessee Valley Authority, and American Electric Power.

**Lone Mountain:** The Lone Mountain property is located in Harlan County, Kentucky. The company leases the property to Ark Land Company, a subsidiary of Arch Coal, Inc. Production is shipped to utility customers, such as Georgia Power and the Tennessee Valley Authority.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
